Name	Country code
Afghanistan	AFG

STUDY TYPE
Other Household Survey [hh/oth]

ABSTRACT
The situation inside Afghanistan deteriorated in 2022 and had significant consequences for the most vulnerable among the population. 1.6 million new arrivals have been witnessed in neighboring countries. While 5.3 million refugees returned to Afghanistan in phases since 2002, this trend has been declining in recent times with just over 6,500 people choosing to return in 2022. Since August 2022, UNHCR has maintained a non-return advisory for Afghanistan (reaffirmed February 2023), calling for a halt on forced returns of Afghan nationals.

To assess people's ability to access the right to return and map potential protection risks and human rights violations faced by people, over 55,000 interviews were conducted with people across six crossing points from Pakistan, Iran and Central Asia into Afghanistan. Interviews were conducted through out 2022. Interviewees were selected to gain an understanding of triggers, intentions and reasons for Afghan cross-border movements and assess access to territory.

This dataset is the anonymized version of the original data.

KIND OF DATA
Sample survey data [ssd]

UNIT OF ANALYSIS
Households

Version

VERSION DESCRIPTION
v2.1: Edited, cleaned and anonymised data

VERSION DATE
2023-09-21

Scope

NOTES
The survey was conducted with one focal point from each household covering the following:
1. Displacement history
2. Problems during return
3. Problems in and current ties to country of asylum
4. Resources for reintegration

TOPICS

Topic
Livelihood and Social cohesion

| Education |
| Basic Needs |
| Domestic Needs/Household Support |
| Shelter/Other Infrastructure |
| Legal Assistance/Protection |

Coverage

GEOGRAPHIC COVERAGE
Border crossing points into Afghanistan from Iran, Pakistan and Central Asia
