ABSTRACT

The Results-Monitoring Survey (RMS) was conducted by UNHCR South Sudan in the last quarter of 2022 to serve as a pilot tool for measuring country operations' results regarding internally displaced persons (IDPs). Using computer-assisted personal interviews, around 4,634 questionnaires were carried out proportionally across eight states. The target was IDPs in camps and non-camp settings, including hard-to-reach areas. A simple random sampling method was used to allow generalizability and minimize bias. The questionnaire was tailored to the local context while drawing from the standard RMS instrument. Sample sizes were calculated for states and counties based on displacement figures and partner presence. A 95% confidence level and 5% margin of error determined the state samples. The county samples used 90% confidence and 5% margins given the need for greater precision at lower administrative levels. Total target was 5,309 households, allocated proportionally. High response rate (97%) exceeded targets in some counties. The pilot provides baseline data on results indicators to track over time. Key aspects were representative sampling, localized questionnaire, sufficient sample size, and community access enabling quality data for ongoing monitoring.

## SAMPLING PROCEDURE

The sampling procedure for the 2022 South Sudan Results Monitoring Survey by UNHCR involved a simple random sampling approach within a probability sampling framework, ensuring impartiality and representativeness. This method facilitated the generalization of findings to the broader population of internally displaced persons (IDPs) in South Sudan.

## DATA COLLECTION MODE

Computer Assisted Telephone Interview [cati] Computer Assisted Personal Interview [capi]

## DATA COLLECTION NOTES

During the data collection phase of the 2022 South Sudan Results Monitoring Survey, field enumerators conducted computer-assisted personal interviews with households in various locations, including camps and remote areas. This approach, coupled with daily data checks and weekly debriefings, ensured the accuracy and completeness of the gathered information on internally displaced persons (IDPs).
