ABSTRACT
This UNHCR dataset, developed in partnership with Ipsos SA, provides an in-depth analysis of the intentions and circumstances of Ukrainian refugees in Austria, based on data collected from January to March 2023. The survey, which includes responses from 553 households representing over 1,500 refugees, offers a detailed look at the socio-economic status, decision-making processes, and future plans of these individuals. Gathered via an online questionnaire distributed through social media and messaging apps, the data is carefully anonymized, ensuring privacy while maintaining a representative demographic profile in line with the latest Austrian government statistics. This dataset is a valuable asset in the Microdata Library, offering crucial insights for stakeholders engaged in refugee support and policy-making in Austria.
