## Identification

### SURVEY ID NUMBER

UNHCR\_TJK\_2023\_RMS\_anon\_data\_v2.1

### TITLE

Results Monitoring Survey 2023

### COUNTRY

Name	Country code
Tajikistan	TJK

### STUDY TYPE

Socio-Economic/Monitoring Survey [hh/sems]

### ABSTRACT

The UNHCR Results Monitoring Survey (RMS) is a household-level survey covering people who are directly or indirectly assisted by UNHCR. In the Tajikistan the survey covered rejected Asylum-Seekers and refugees. The objective of the survey is to monitor impact and outcome level indicators on education, healthcare, livelihoods, protection concerns, shelter, and water and sanitation. The results contribute to an evidence base for reporting against UNHCR's multi-year strategies to key stakeholders.

The RMS can be implemented in any operational context. A standard structured questionnaire has been developed for the RMS, which can be conducted as a stand-alone survey or flexibly integrated with other data collection exercises. The questionnaire was adapted to the Tajik context and programme objectives by removing, e.g. questions related to camp settings. The data includes indicators collected at both the household and individual (household-member) level. The survey covered 340 household amounting to 1790 individuals.

### KIND OF DATA

Sample survey data [ssd]

### UNIT OF ANALYSIS

Households

## Version

### VERSION DESCRIPTION

v2.1: Edited, cleaned and anonymised data

### VERSION DATE

2024-03-29

## Scope

### NOTES

The standard RMS questionnaire was adapted to the Tajikistan context and covers:

1. Household roster and mobility history
2. Access to documentation
3. Vaccines, disability and health service access
