UNHCR\_SSD\_2023\_PDM

TITLE  
Joint Post Distribution Monitoring - 2023

COUNTRY

Name	Country code
South Sudan	SSD

STUDY TYPE  
Sample Frame, Households [sf/hh]

ABSTRACT  
The 2023 Joint Post Distribution Monitoring dataset documents a collaborative effort between UNHCR and WFP in South Sudan. Conducted from January 13 to January 17, 2023, the JPDM exercise assessed the needs of refugees across eight settlements to improve the targeting and prioritization of both food and non-food assistance. Data was collected through face-to-face interviews from 1,295 refugee households, utilizing a stratified random sampling method. The dataset includes various data files such as anonymized household survey results and terms of reference, ensuring the data is cleaned and anonymized to protect privacy. Geographically, the data covers multiple locations, including Gorom, Jam Jang, Maban, and Yambio, encompassing both refugee and internally displaced person populations. This dataset is crucial for developing a needs-based approach to humanitarian aid in the region and is publicly accessible for further analysis and research.

KIND OF DATA  
Sample survey data [ssd]

UNIT OF ANALYSIS  
Household

## Version

VERSION DESCRIPTION  
v2.1: Edited, cleaned, and anonymised data.

VERSION DATE  
2024-04-16

## Scope

NOTES  
The scope includes:

- demographics
- cash and livelihoods
- protection
- health
- education
- accomodation
- accountability
- feedback on humanitarian assistance

TOPICS

Topic
Health

Protection
Food security
Education
Livelihood and Social cohesion
Gender Based Violence
Child Protection
Mental Health and Psychosocial Support
Cash Assistance

## KEYWORDS

<b>Keyword</b>
Distribution
Monitoring

## Producers and sponsors

## PRIMARY INVESTIGATORS

<b>Name</b>
UNHCR

## Sampling

## SAMPLING PROCEDURE

The 2023 Joint Post Distribution Monitoring in South Sudan used a stratified random sampling method within a cluster design, targeting 1,295 households across eight refugee settlements to ensure a representative sample of the population.

## Data collection

## DATES OF DATA COLLECTION

Start	End
2024-01-13	2024-01-17

## DATA COLLECTION MODE

Face-to-face [f2f]

## DATA COLLECTION NOTES

The 2023 Joint Post Distribution Monitoring in South Sudan collected data through face-to-face interviews with 1,295 households in eight refugee settlements. Enumerators received specific training and conducted interviews in local languages to ensure clarity and accuracy. Regular validation and coordination with local authorities helped navigate logistical challenges effectively.
