ABSTRACT

UNHCR conducted a Cash-Based Intervention (CBI) in mid-2022 for refugees residing in Ogoja and Kwande, Cross River and Benue States, Nigeria. This Post-Distribution Monitoring (PDM) survey, carried out from August 5 to August 9, 2022, aimed to evaluate the intervention's effectiveness, efficiency, and gather beneficiary feedback. A total of 830 households were interviewed: 207 in Kwande and 623 in Ogoja, with household selection based on cluster stratified random sampling by location and household size. The results offer comprehensive feedback for improving future interventions and program monitoring.

Sampling

SAMPLING PROCEDURE

The 2022 PDM survey used a probability-based, cluster stratified random sampling method. Households were stratified by location (Ogoja and Kwande) and household size, with a total of 830 households interviewed (207 in Kwande and 623 in Ogoja). This sampling approach ensured representation across settlement sizes and provided detailed insights into the effectiveness and efficiency of the cash-based interventions.
