ABSTRACT

The dataset captures the outcomes of a post-distribution monitoring survey conducted by UNHCR in December 2019. The survey evaluated the impact of the second cash-assistance intervention provided to refugees in Ogoja and Kwande, located in Cross River and Benue States, Nigeria. The cash-assistance aimed to support various refugee needs, including food, shelter, non-food items, health, and education. Over 950 households were interviewed between December 15-18, 2019, using a face-to-face interview technique. The data collection followed a stratified random sampling procedure, focusing on location and household size. The primary purpose of the dataset is to monitor and evaluate the effectiveness of the cash-based interventions under UNHCR's protection mandate. This dataset serves as a crucial resource for program monitoring, operational planning, and understanding the needs and outcomes of cash-assistance programs for refugees in Nigeria.
