TITLE

Post-Distribution Monitoring of In-Kind Assistance, 2024

COUNTRY

Name	Country code
Bangladesh	BGD

STUDY TYPE

Income/Expenditure/Household Survey [hh/ies]

ABSTRACT

More than 900,000 Rohingya refugees are living in extremely congested camps in Cox's Bazar, Bangladesh. Since their arrival in Bangladesh, they have been dependent on humanitarian aid for their survival, including food, core-relief items, shelter and other basic services.

The in-kind relief items were distributed between January 2024 and May 2024 to 97,769 households. The in-kind relief items included Female Hygiene Kit, LPG, Shelter Materials and NFI kits.

UNHCR conducted Post Distribution Monitoring (PDM) to collect refugees' feedback on the quality, sufficiency, utilization, and effectiveness of the assistance we provide, which helps improve and adapt the services as per the refugees' needs.

For this PDM exercise, a mixed methodology incorporating both qualitative and quantitative methods was used. By qualitative method, FGD (Focus Group Discussion) disaggregated by gender and age were conducted with recipients of in-kind assistance in 9 camps. 20 group discussions (9 male groups, 9 female groups and 2 GDP groups) took place in July 2024. Whereas by quantitative method, in-person survey with structured reviewed questionnaires for NFI and shelter recipients took place. A total of 1795 households were interviewed by trained independent enumerators from June-July 2024 in 16 refugee designated camp locations (15 camps in Cox's Bazar and 1 Camp in Bhasan Char) where UNHCR and its partners distributed non-food items and shelter material.

Households

Version

VERSION DESCRIPTION

v2.1: Edited, cleaned and anonymised data

VERSION DATE

2024-12-20

Scope

NOTES

The survey was conducted with one focal point from each recipient household. The respondent is asked question about multiple distribution items, Non-Food items, Female Hygiene kits and LPG. The respondent is asked their feedback on these items covering the following points:

1. Quality of items
2. Sufficiency of items
3. Usefulness of items
4. Distribution process
5. Actual use of items

6. Assistance preference and their access to communication and complaints mechanisms

7. Overall feedback and suggestions for future CRIs, incl on sustainability

Sampling

SAMPLING PROCEDURE

A stratified random sample was drawn using camp as a stratum with head of household gender consideration. The NFI sample size was determined from the recipient households on 95% confidence level and 10% margin of error. The sample was increased by 10% for contingency and non-response rate purposes.
