ABSTRACT

This dataset is the second round of UNHCR's Intention Surveys with refugee returnees to Ukraine, implemented in partnership with Ipsos SA. Data collection was conducted between July and August 2024 and includes close to 1,500 refugee returnee households in Ukraine. The survey includes a longitudinal component, with part of the sample having participated in previous rounds. A mixed methodological approach was used, combining two data collection modes and mixed sampling design. The anonymized dataset includes household- and individual-level data and supports inter-agency planning and evidence-based response related to refugee returns and sustainable reintegration.
