ABSTRACT
In early November 2020, conflict broke out in the north of Ethiopia and this has displaced many from their homes. From 11 December — 14 January 2021, the Displacement Tracking Matrix (DTM) deployed its Emergecny Site Assessment to capture internal displacement related to the Northern Ethiopia Crisis. This multisectoral location assessment assesses the number of internally displaced persons (IDPs) and collects basic information on the multisectoral needs of IDPs at site level.
