ABSTRACT
This dataset presents the results of a regional online survey conducted by UNHCR from 14 March to 14 April 2025 to assess the intentions of Syrian refugees and asylum-seekers residing in 14 European countries. A total of 3,736 respondents, representing 17,378 household members, participated in the anonymous, self-administered survey. The data capture intended future movements, factors influencing decision-making, information needs, and interest in return-related activities. The survey aims to inform protection and solutions programming by ensuring refugee perspectives are central to policy discussions.

Sampling

SAMPLING PROCEDURE
Non-probability sampling using a respondent-assisted (snowball) approach. The survey was disseminated via UNHCR Help webpages, social media, refugee-led organizations, and community networks. Automatic screening excluded non-Syrian nationals and individuals who were not refugees or asylum-seekers.

WEIGHTING
Each interview was weighted (`int_weight`) to reflect the relative size of the Syrian refugee and asylum-seeker population in the respondent's country of residence, based on UNHCR population statistics as of end-2024. This ensures proportional representation in regional analyses.

Data collection

DATES OF DATA COLLECTION

Start	End
2025-03-14	2025-04-14

DATA COLLECTION MODE
Face-to-face [f2f]

DATA COLLECTION NOTES
The survey was self-administered online and designed to be completed in 5–10 minutes. It was anonymous and automatically excluded respondents who did not self-identify exclusively as Syrian nationals or who were not refugees or asylum-seekers. Dissemination was conducted via UNHCR Help platforms, social media, refugee-led organizations, and community networks.
