STUDY TYPE

Sample Frame, Households [sf/hh]

ABSTRACT

This dataset presents findings from the 2023 Standardized Expanded Nutrition Survey (SENS) conducted at the Alemwach refugee site in Ethiopia's Amhara region. Established in 2020, Alemwach hosts Eritrean refugees relocated from northern Tigray due to conflict. The survey, led by UNHCR and RRS in collaboration with government and partner organizations, aimed to assess the health, nutrition, food security, and WASH conditions of the refugee population. Using the SENS Version 3 (2018) and SMART methodology, data were collected through face-to-face interviews with households selected via simple random sampling. As of December 1, 2023, Alemwach hosted 21,557 individuals, including 1,940 children under five (9% of the population). The anonymized dataset supports evidence-based planning and targeted interventions to address the essential needs of refugees residing in Alemwach.

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

Household

Version

VERSION DESCRIPTION

v2.1: Edited, cleaned, and anonymised data.

VERSION DATE

2025-06-23

Scope

NOTES

The scope includes:

- Demographic profile
- Mortality
- Anthropometric and child health indicators
- Anaemia among children and women
- IYCF practices
- Food consumption and coping strategies
- In-kind food assistance
- Ownership and use of mosquito nets
- Access to WASH services and hygiene products

TOPICS

Topic

Health and Nutrition
Water Sanitation Hygiene
Malaria Prevention and Control

Sampling

SAMPLING PROCEDURE

A simple random sampling strategy was applied to select households within the Alemwach refugee site. The sample size was calculated using UNHCR SENS Version 3 (2018) guidelines, taking into account estimated prevalence rates, desired precision, and design effect. The survey team conducted household listing prior to selection to ensure a complete sampling frame.

WEIGHTING

Sampling weights were calculated to reflect the inverse probability of selection of each household, accounting for the total refugee population in Alemwach and the achieved sample size. These weights correct for unequal probabilities of selection and allow extrapolation of survey estimates to the entire camp population.

Data collection

DATES OF DATA COLLECTION

Start	End
2023-12-11	2023-12-16

DATA COLLECTION MODE

Face-to-face [f2f]

DATA COLLECTION NOTES

Data collection was conducted face-to-face using mobile devices between December 11 and 16, 2023, at the Alemwach refugee site. Field teams were trained on the Standardized Monitoring and Assessment of Relief and Transitions (SMART) methodology and SENS tools prior to deployment.
