ABSTRACT
Community-Based Protection Monitoring (CBPM) is one of UNHCR’s key tools to identify and monitor protection issues including violations of rights, displacement, needs of vulnerable populations, access to rights and services, safety, freedom of movement, and incidents involving Gender-Based Violence (GBV), Child Protection (CP), explosive hazards, and Housing, Land and Property (HLP). The 2024 data covers the full year and was collected using standardized tools jointly developed with the Afghanistan Protection Cluster (APC), including household interviews (HH), key informant interviews (KII), and focus group discussions (FGDs). The data supports protection analysis and humanitarian programming by providing disaggregated information across age, gender, and population groups.
