#### ABSTRACT

An estimated 738,000 Rohingya refugees have fled violence in Myanmar's Rakhine state since August 25, 2017. Most of the refugees rely on humanitarian assistance, having left with few possessions and exhausted their financial resources on the journey. The cyclone and monsoon seasons, stretching from May to October, further threatened the living conditions of the vast majority of refugees living who are in makeshift shelters and settlements highly vulnerable to floods and landslides.

To understand the evolving priority needs of the refugees, and to understand change over time, this Multi-Sector Needs Assessment (MSNA), coordinated by the United Nations High Commissioner for Refugees (UNHCR) and with technical support from REACH, was conducted in 33 refugee sites using a household survey methodology (3,165 households were surveyed). It is a follow up assessment to MSNA I in July 2018.

Results of this MSNA are generalizable to the camp level with 95% confidence level and 10% margin of error. Support for questionnaire translation and enumerator language training was provided by Translators Without Borders.

## Sampling

### **Sampling Procedure**

---

Data collection was conducted in 33 refugee sites. The sample frame was developed to yield representative results at the camp level at a 95% confidence level with 10% margin of error at the camp level, and 95% confidence level with 5% margin of error at aggregate level for all camps.

### **Weighting**

---

Sample weights for the household data were computed dividing, for each camp, the population by the sample size.
