TITLE

Post-Return Monitoring Survey - 2025

COUNTRY

Name	Country code
Afghanistan	AFG

ABSTRACT

The Post-Return Monitoring (PRM) Survey Round 3 was conducted by UNHCR in 2025 to assess the well-being, protection situation, and reintegration experiences of Afghan refugee returnees from Pakistan and Iran. The survey targeted returnee households who received UNHCR assistance upon return.

The PRM Round 3 collected data across key thematic areas including protection, basic needs and services, shelter, livelihoods and income generation, food security, health, mental health, education, WASH, and connectivity. The survey was designed to generate nationally representative insights.

Findings from the survey contribute to UNHCR protection monitoring, program planning, and evidence-based advocacy. The data supports analysis of reintegration trends, identification of priority needs and risks, and the development of interventions aimed at promoting sustainable reintegration and longer-term solutions for returnees in Afghanistan.

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

Household and individual.

Version

VERSION DESCRIPTION

v2.1: Edited, cleaned and anonymised data.

Scope

NOTES

The scope includes:

- Demographic and return profile of Afghan refugee returnees
- Protection concerns and coping mechanisms
- Access to basic services (education, healthcare, shelter, water and sanitation)
- Livelihoods and income generation
- Food security and basic needs
- Community engagement and social cohesion
- Reintegration challenges and local solutions
