999: respondent does not know

Hello. My name is _____. I would be grateful if you could spend some time answering my questions. This survey will help us better understand the situation of refugees in Rwanda, and how the presence of refugees may impact local communities. We interviewers are hired by a team of academic researchers from Maastricht University who are conducting this research for academic purposes. Therefore our work is not to provide any assistance or direct help, but to make sure that your situation and concerns are voiced upwards to those in the government or international organizations who may be able to help you and your community.

This interview is anonymous and your name will not be mentioned in any report or document. You are not obliged to answer any question, and you can stop at any moment you want. I thank you for accepting to help me. Do you want to ask me anything about the interview before you decide to participate?
