### Overview

**ABSTRACT**  
Since 2014, UNHCR has undertaken a comprehensive revision of the framework for monitoring UNHCR Livelihoods and Economic Inclusion programs. Since 2017, mobile data collection (survey) tools have been rolled out globally, including in Kenya. The participating operations conducted a household survey to a sample of beneficiaries of each livelihoods project implemented by UNHCR and its partner. The dataset consists of baseline (115 observations) and endline data (105 observations) from the same sample beneficiaries, in order to compare before and after the project implementation and thus to measure the impact.

- Representativeness of sub-groups (gender, camp, etc.) should be kept as much as possible
- Baseline and endline beneficiaries should be the same

### Deviations from Sample Design

---

Some operations may deviate from the sampling guidance due to local constraints such as logistical and security obstacles.

### Response Rate

---

Information not available

### Weighting

---

No weights were applied during the analysis

The dataset presented here has undergone light checking, cleaning, harmonisation of localised information, and restructuring (data may still contain errors) as well as anonymization (includes removal of direct identifiers and sensitive variables, and grouping values of select variables). Empty values can occur for several reasons (e.g. no occurrence of agricultural interventions among the beneficiaries will result in empty variables for the agricultural module).
