### Overview

---

ABSTRACT  
This assessment was carried out in Zimbabwe's Tongogara Refugee Camp. Its aim was to help UNHCR better understand refugees' and asylum seekers' living conditions and needs, which in turn will inform priority setting, programming and advocacy. The assessment was underpinned by the objectives of the "Graduation Approach" which targets support to the ultra-poor amongst the refugee population. A quantitative survey was conducted among 386 households during October 2017.

## Sampling

### Sampling Procedure

---

The survey's objective was to deliver representative data of all households living in Zimbabwe's Tongogara Refugee Camp. The total population of the camp at the time of the survey was estimated at around 3,200 households.

For this survey, a simple random sample design was applied (i.e. non-stratified, single-stage/non-clustered design). Households were randomly selected from UNHCR's registration database using a random number generator.

The total sample size was 386 refugee/asylum-seeker households.

### Deviations from Sample Design

---

None.

### Response Rate

---

Information unavailable.

### Weighting

---

This dataset is self-weighting. Nevertheless, the dataset contains a uniform weights variable that reflects the overall selection probability of the sample.

# Questionnaires

## Overview

---

All questionnaires are provided in section "external ressources".

The questionnaire includes the following sections:

- Demographic information
- Household shelter and services
- Household assets
- Livelihoods and incomes
- Livestock farming
- Expenditures
- Food sources and consumption
- Coping strategies
- Media/internet use
- Subjective assessment of well-being

## Data Collection

### Data Collection Dates

Start	End	Cycle
2017-10-23	2017-10-27	N/A

### Data Collection Mode

Face-to-face [f2f]

### Data Collection Notes

Data was collected through computer-assisted face-to-face interviewing (CommCare software). For the successful data collection, 10 (ten) enumerators were recruited and trained for three days. The training also encompassed pilot testing of the tool in the camp. This was then followed by 5 (five) days of mobile data collection using CommCare. Debriefing of the pilot process helped significantly.

### Questionnaires

All questionnaires are provided in section "external ressources".

The questionnaire includes the following sections:

- Demographic information
- Household shelter and services
- Household assets
- Livelihoods and incomes
- Livestock farming
- Expenditures
- Food sources and consumption
- Coping strategies
- Media/internet use
- Subjective assessment of well-being
