Overview

ABSTRACT

This report provides the findings of the standard expanded Nutrition survey (SENS) which was conducted in the three refugee camps in Tanzania, Nyarugusu, Nduta and Mtendeli from 15th August to 23rd September 2016. Two surveys were conducted in Nyarugusu refugee camp to allow comparison among the old population predominantly from the Democratic Republic of Congo and the new arrivals mostly the Burundians and Congolese who arrived in the camp as from May 2015.

The main objective of the 2016 nutrition survey was to determine the health and nutrition status among children 6-59 months living in the refugee camps. Additional indicators on child health such as immunization, vitamin A supplementation, incidence of diarrhoea in the past two weeks, infant and young child feeding practices (IYCF) and anaemia prevalence among children aged 6- 59 months and non -pregnant women aged 15 - 59 years, household food security, WASH, Mosquito net coverage and mortality were also assessed.

The survey employed the Standardised Monitoring and Assessment of Relief and Transitions (SMART) methodology in accordance with the UNHCR Standardised Expanded Nutrition Survey guidelines V2 2013. Multi-stage cluster sampling method was applied to select households in Nyarugusu and Mtendeli camps whereas simple random sampling was used in Nduta refugee camps. In all the camps a total of 2062 children 6- 59 months were assessed during the survey period. The population of non-pregnant women of reproductive age (15-49 years) is not stated.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Individuals & Households

Scope

NOTES

Children 6-59 months:

Prevalence of Acute Malnutrition, Stunting, Prevalence of anaemia, Measles vaccination and Vitamin A coverage, Diarrhea,

Infants 0 - 6 months:

Infant and young child feeding practices (IYCF)

Non-pregnant women of reproductive age (15-49 years):

Anaemia

Households:

Food security, WASH, Mosquito net coverage, Mortality Rates,

TOPICS

Topic	Vocabulary	URI
Food security		
Water Sanitation Hygiene		

Coverage

GEOGRAPHIC COVERAGE

All refugee camps in Kigoma Region (Nyarugusu, Nduta and Mtendeli), Tanzania

UNIVERSE

The survey covered all de jure household members (usual residents), all women aged 15-49 years resident in the household, and all children aged 0-4 years (under age 5) resident in the household.

Sampling

Sampling Procedure

cross-sectional multi-stage cluster surveys, probability proportional to size, Systematic random sampling

Weighting

Not info provided

Questionnaires

Overview

The SENS modules include standardized questionnaires, analysis guidance, reporting format and standard analysis procedures.

4 questionnaires were included in this version:

1. Household demographics
2. Household mosquito nets, food security and WASH
3. Individuals, children under 5
4. Individuals, women between 15-49

Data Collection

Data Collection Dates

Start	End	Cycle
2016-08-15	2016-09-23	N/A

Data Collection Mode

Computer Assisted Personal Interview [capi]

Questionnaires

The SENS modules include standardized questionnaires, analysis guidance, reporting format and standard analysis procedures.

4 questionnaires were included in this version:

1. Household demographics
2. Household mosquito nets, food security and WASH
3. Individuals, children under 5
4. Individuals, women between 15-49
