Overview

ABSTRACT

The Monitoring of the Effects of the Economic Deterioration on Refugee Households dataset is a Phone survey of Syrian and non-Syrian households to monitor the changes over time in key areas in the context of the deteriorating economic situation in Lebanon. The UNHCR call center was used to conduct the two waves of data collection: 20-28 February (Wave I) and 17 April-15 May (Wave II). Several call attempts were made at different times of the day to reach the largest possible number of households.

After the Wave I of the survey, which was collected before the first case of Covid 19 was reported in Lebanon, the Wave II was conducted to account for the impacts of the spread of the Covid 19 virus on refugees, the level of awareness among them and their accessibility to hygiene items and health care services. This dataset includes only Wave1 for the non-Syrian refugees cases.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Household

Scope

NOTES

The questionnaire included key indicators on household demographics, shelter, expenditures, livelihoods, debt, coping strategies, food security and consumption, and health.

The scope includes:

- key indicators on household demographics
- accommodation
- rent
- employment
- health

- food security
- livelihoods
- food consumption
- debt
- coping strategies and assistance
- intention to return
- education

Sampling

Sampling Procedure

In order to facilitate regular monitoring of the change for households nationally, this monitoring approach will employ a phone survey approach conducted on a quarterly basis with wave 1 starting in February 2020.

To achieve this, a simple random sampling approach was used, extracted from UNHCR database in Lebanon. Two nationally representative samples were extracted: (1) Syrian refugees, and (2) Non-Syrian refugees. Each sample is estimated at 500 (total 1,000) refugee households.

To account for non-response rate, the data samples were enlarged: 1,000 Syrians and 1,000 non-syrians.

Response Rate

The response rate in WAVE I was 42% for non-Syrians (417 completed surveys).

Weighting

Weights were assigned to each sample according to the population of refugees registered in the country. The weighting system was used to compensate for the unequal probabilities of a household being included in the sample.

Questionnaires

Overview

The questionnaire included key indicators on household demographics, shelter, expenditures, livelihoods, debt, coping strategies, food security and consumption, and health.

Data Collection

Data Collection Dates

Start	End	Cycle
2020-02-21	2020-02-28	N/A

Data Collection Mode

Computer Assisted Telephone Interview [cati]

Data Collection Notes

Interviews were made by phone.

Questionnaires

The questionnaire included key indicators on household demographics, shelter, expenditures, livelihoods, debt, coping strategies, food security and consumption, and health.
