Overview

ABSTRACT

UNHCR (Cox's Bazar Field Office) conducted the second round of its WASH Knowledge, Attitude and Practice (KAP) survey from 24th November to 19th December 2019 in UNHCR's area of operation in Kutupalong and Teknaf. Five WASH partners implemented the survey: NGO Forum, BRAC, OXFAM, Solidarité International and ACF. Preparation began in early November, as UNHCR discussed methodologies with participating agencies.

Several meetings focussed on issues such as; staffing for the data collection and financial issues such as 'per diem' allowances. Several partner enumerators and their team leaders had no previous experience in KAP surveys, therefore, training modules were developed and implemented by UNHCR WASH staff. The objective of the survey was to better plan and guide future UNHCR WASH interventions implemented through NGO partners.

Sampling

Sampling Procedure

The number of interviews required to be statistically rigorous has initially been calculated to be 1,316. This was calculated by estimating a 5% non-response rate to reach a 95% confidence level. Finally, the distribution of households to be interviewed reached the number of 1,649, giving a 35% assurance of reaching the target.

Weighting

Weights were added ex post. Sample weights for the household data were computed dividing the population by the sample size

Questionnaires

Overview

The questionnaire was reviewed with all NGO partners. In comparison to the 2018 survey, a written translation for each question, in Bangla, was added. Most questions were identical in both surveys; however, some were reformulated to become clearer and more precise. This made comparison with previous survey more challenging. The questionnaire had 9 sections, alphabetically ordered from A until I (see attached Annex).

Sections

0. Introduction

A. GENERAL INFORMATION AND DEMOGRAPHICS B. WATER COLLECTION AND STORAGE C. DRINKING WATER HYGIENE

D. HYGIENE

E. SANITATION

F. MESSAGING

G. WASH NFI Distribution

H. DIARRHEA PREVALENCE, KNOWLEDGE AND HEALTH SEEKING BEHAVIOR

I. MENSTRUAL HYGIENE

Data Collection Mode

Face-to-face [f2f]

Data Collection Notes

Each NGO partners collected data from households located in camps other than their own area of operation. This was done to avoid the possibility of bias due to familiarity and acquaintance with the households.
