Overview

ABSTRACT

Since 2016, the Vulnerability Assessment of Refugees of Other Nationalities (VARON) has been a key tool for advocacy and program design.

The key objectives of the VARON include: • Providing a multi-sectoral update of the situation of refugees from Iraq and other countries in Lebanon through an annual household survey. The survey covers key indicators related to multiple sectors including protection, shelter, water and hygiene, health, livelihoods, socio-economic vulnerability, food security and more. • To enhance the targeting for the provision of multi-purpose cash assistance. The data gathered through the VARON, particularly on expenditure, is used to build econometric models, which are used to determine eligibility for multi-purpose cash and food assistance.

UNITS OF ANALYSIS

Household and individual.

Sampling

Sampling Procedure

The assessment surveyed a total of 665 refugee households (1,823 individuals) of Iraqi and other nationalities registered with UNHCR Lebanon.

The total number of households in the UNHCR registration database as of March 2019 was used as the sampling pool from which the targeted

sample was selected. Sampling occurred through simple random sampling, separately for Iraqi refugees and refugees of other nationalities

to ensure representative results for each population group. The distribution of this refugee population in Lebanon is concentrated in 2 of the 26 districts (Beirut and Mount Lebanon). As such, no geographical stratification was applied to the sample methodology.

Weighting

Weights were assigned to each nationality group (Iraqi and non Iraqi) according to the population of refugees registered in the country. The weighting system was used to compensate for the unequal probabilities of a household/individual being included in the sample.

Questionnaires

Overview

The questionnaire included key information on household demographics, arrival profile, registration, protection, shelter, WASH, assets, health, security, livelihoods, expenditures, food consumption, coping strategies, debts and assistance, as well as infant and young feeding practices.

The questionnaire is a household survey administered typically with the head of household or another adult household member. The interview took around 1 hour per household to complete.
