NOTES

Overview

ABSTRACT

The Monitoring of the Effects of the Economic Deterioration on Refugee Households dataset is a Phone survey of Syrian and non-Syrian households to monitor the changes over time in key areas in the context of the deteriorating economic situation in Lebanon. This wave focuses on: livelihoods, economic vulnerability, living conditions, access to health services, food and livelihood coping strategies, covid-19. This dataset includes only the non-Syrian refugees cases.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Household

Scope

NOTES

The scope includes:

- Livelihoods: Loss of jobs, salary cuts, job retention and new job opportunities
- Economic vulnerability: household debt
- Living conditions: rental costs, mobility, eviction and eviction threats
- Access to health services: demand and access to primary healthcare and hospitalization
- Food and Livelihood Coping Strategies: Rates of key negative food and non-food related coping strategies
- COVID-19: Access to hygiene items

Sampling

Sampling Procedure

A nationally representative sample was extracted from the UNHCR database in Lebanon using a simple random sampling approach. Two nationally representative samples were extracted: (1) Syrian refugees, and (2) Non-Syrian refugees. Data collected through the call center via Phone survey. To accounting for non-response rate, 1,000 Syrian and 1,000 non-Syrian cases were sampled. NB: Please note that while comparison is usually made to VARON/VASYR, methodologies completely differ and as such comparisons should be approached with caution and not interpreted to the dot. Result: High non-response rate for non-Syrians (close to 65%). Therefore results might not be representative of the non-Syrian population and therefore should be treated with caution. 353 interviews completed.
