Supervision

Data was collected by 14 teams. Each team was composed of 3-4 interviewers, one supervisor, a measurer, and a field editor.

Data Processing

Data Editing

Data was processed using the Census and Survey Processing System (CSPro). In order to ensure quality control, all questionnaires were double entered and internal consistency checks were performed. Procedures and standard programs developed under the global MICS4 programme and adapted to the Lebanon (Palestinians) questionnaires were used throughout. Data entry began in June 2011 and was concluded in July 2011. Data processing ended in October 2011, and overall data quality was assessed in November 2011. Data were analysed using the Statistical Package for Social Sciences (SPSS) software program, Version 19, and the model syntax and tabulation plans developed by UNICEF were used for this purpose.
