Overview

ABSTRACT

The enrolment of Internally Displaced Persons (IDPs) was conducted in Maradi, Tahoua and Tillabéri in Niger by the Government through the National Committee for Data Collection and Information Management on Internally Displaced Persons in Niger established in October 2019. The Committee acts in these regions with the technical support of UNHCR. Its aim is to ensure an adequate protection response for IDPs following the attacks perpetrated by non-state armed groups in their villages. The enrolment helped to identify the socio-economic profile of IDPs and their needs, detect potential cases of statelessness, and ease the aid of the humanitarian community. The enrolment data contain information on heads of households, family composition, specific needs of household members, documents held by family members, reasons for displacement, places of origin and current location. In Maradi, 2'169 households were registered between April and September 2020. They originated from 9 communes in Guidan Roumji, Madarounfa and other departments in the Maradi region of Niger. The data provided here is a sample of the original data.

KIND OF DATA

Census/enumeration data [cen]

UNITS OF ANALYSIS

households

Scope

NOTES

household demographics, reasons for displacement, return intentions, socioeconomic, education and shelter information

TOPICS

Topic	Vocabulary	URI
Protection		
Education		
Livelihood & Social cohesion		
Shelter/Other Infrastructure		

KEYWORDS

IDP

Coverage

UNIVERSE

The original survey covered 4'859 IDP households. The subset of data here covers a sample of 971 of these households.
