VERSION DESCRIPTION

Version 6.4. The datasets contain selected variables from the original census microdata plus harmonized variables from the IPUMS-International database.

In v6.4, the research team continued to carry out improvements to geography, providing harmonized geographic units for the second administrative level for roughly half the countries. More information about IPUMS geography variables is available [here](https://international.ipums.org/international/geography_variables.shtml). Also, approximately 100 integrated variables were renamed. Affected variables with their current and previous names are listed [here](https://international.ipums.org/international/resources/misc_docs/renamed_variables_sept2015.pdf). Geography variable also underwent wholesale renaming.

In this update, IPUMS added 19 new samples for Armenia, Austria, Costa Rica, Ethiopia, France, Ghana, Mozambique, Paraguay, Portugal, Puerto Rico, South Africa, and Spain. Ethiopia, Mozambique, and Paraguay were newly added countries to IPUMS. Samples for other countries extend pre-existing series for those countries.

Overview

ABSTRACT

IPUMS-International is an effort to inventory, preserve, harmonize, and disseminate census microdata from around the world. The project has collected the world's largest archive of publicly available census samples. The data are coded and documented consistently across countries and over time to facilitate comparative research. IPUMS-International makes these data available to qualified researchers free of charge through a web dissemination system.

The IPUMS project is a collaboration of the Minnesota Population Center, National Statistical Offices, and international data archives. Major funding is provided by the U.S. National Science Foundation and the Demographic and Behavioral Sciences Branch of the National Institute of Child Health and Human Development. Additional support is provided by the University of Minnesota Office of the Vice President for Research, the Minnesota Population Center, and Sun Microsystems.

UNITS OF ANALYSIS

Households and persons

UNITS IDENTIFIED:

- Dwellings: Yes
- Vacant units: No
- Households: Yes
- Individuals: Yes

- Group quarters: Yes

- Special populations: Homeless people, temporarily absent persons, and temporary residents

UNIT DESCRIPTIONS:

- Dwellings: Housing stock are living quarters irrespective of ownership, including residential buildings, special houses (like hostels, houses for lonely and old people, children's homes, boarding houses for disabled, school hostels and boarding school), flats, service housings, other living accomodations in other buildings suited for living.

- Households: A group of people sharing the same housing unit (or one person living alone), jointly keeping the house, i.e. fully or partially pooling their individual budgets for common expenditures for food and daily living needs or having a common budget who may or may not be related by kinship.

- Group quarters: Groups of people living at the same institution (housing unit), sharing meals, without having individual budgets or common consumer expenditures, subject to the same general rules, and usually unelated by kinship.

DDI DOCUMENT VERSION

Version 6.4 (April 2016): Documentation of census data and harmonized variables as found in IPUMS-International. The International Household Survey Network (IHSN) contracted IPUMS International for generating DDI and Dublin Core-compliant metadata related to population and housing census datasets from developing countries. The objective was to provide countries with detailed metadata in a format compatible with the DDI standard used by most of these countries, with a view to guarantee the preservation of the data and metadata, and the publishing of metadata.

The intellectual rights (including copyright) for the data and metadata in IPUMS are retained by the countries under a Memorandum of Understanding with the contributing countries. IPUMS-International has distribution rights to the metadata and data. The XML documents generated by this process are viewed as a distribution of the metadata.

Fields edited by the World Bank are: DDI ID and study ID to match World Bank study naming convention, as well as DDI Document Version and Version Description to reflect changes included in version 6.4.

Previous version documented in the World Bank Microdata Library:

- v6.3 (August 2014)

Sampling

Sampling Procedure

MICRODATA SOURCE: National Statistical Committee of the Kyrgyz Republic

SAMPLE DESIGN: 20% sample drawn by the country: systematic sample of every 5th household or every 5th individual in collective household

10% sample drawn by MPC from the 20% sample: systematic sample of every 2nd household

SAMPLE UNIT: Households

SAMPLE FRACTION: 10%

SAMPLE SIZE (person records): 476,886 (persons in private and selected households only)

Response Rate

COVERAGE: 100%

Weighting

Self-weighted. Expansion factor = 10.

Record type (RECTYPE)

File: KGZ1999-H-H

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 0
Invalid: 0

Description

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

Year (YEAR)

File: KGZ1999-H-H

Overview

Type: Discrete
Format: numeric
Width: 4
Decimals: 0
Range: 1960-2011

Valid cases: 0
Invalid: 0

Description

YEAR gives the year in which the census was taken.

IPUMS sample identifier (SAMPLE)

File: KGZ1999-H-H

Overview

Type: Discrete
Format: numeric
Width: 9
Decimals: 0
Range: 32197001-894201001

Valid cases: 0
Invalid: 0

Description

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g, 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

Household serial number (SERIAL)

File: KGZ1999-H-H

Overview

Type: Continuous
 Format: numeric
 Width: 10
 Decimals: 0

Valid cases: 0
 Invalid: 0

Description

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002
 Colombia 1993, 2005
 Costa Rica 1984, 2000
 Cuba 2002
 Dominican Republic 1981, 2002, 2010
 Ecuador 1990, 2001
 Germany 1971
 Hungary 1980, 1990, 2001
 Jamaica 1982, 1991, 2001
 Malaysia 1970, 1991, 2000
 Mexico 1995, 1990, 2000, 2005
 Nigeria 2006
 Panama 2000
 Peru 1993, 2007
 Portugal 1981, 1991, 2001
 Spain 1991
 Uruguay 2011
 Venezuela 1990, 2001
 Vietnam 1989

In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

Number of person records in the household (PERSONS)

File: KGZ1999-H-H

Overview

Type: Continuous
 Format: numeric
 Width: 3
 Decimals: 0

Valid cases: 0
 Invalid: 0

Description

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

Subsample number (SUBSAMP)

File: KGZ1999-H-H

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 0-99

Valid cases: 0
 Invalid: 0

Description

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

Group quarters (collective dwelling) status (GQ)

File: KGZ1999-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

Number of unrelated persons (UNREL)

File: KGZ1999-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

UNREL indicates the number of persons in the household who are unrelated to the head.

Urban-rural status (URBAN)

File: KGZ1999-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 0
Invalid: 0

Description

URBAN indicates whether the household was located in a place designated as urban or as rural.

Continent and region of country (REGIONW)

File: KGZ1999-H-H

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 11-54

Valid cases: 0
 Invalid: 0

Description

REGIONW identifies the continent and region of each country.

Water supply (WATSUP)

File: KGZ1999-H-H

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 0-99

Valid cases: 0
 Invalid: 0

Description

WATSUP describes the physical means by which the housing unit receives its water. The primary distinction is whether or not the household had piped (running) water.

Sewage (SEWAGE)

File: KGZ1999-H-H

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 0-99

Valid cases: 0
 Invalid: 0

Description

SEWAGE indicates whether the household has access to a sewage system or septic tank.

Telephone availability (PHONE)

File: KGZ1999-H-H

Overview

Type: Discrete
 Format: numeric
 Width: 1
 Decimals: 0
 Range: 0-9

Valid cases: 0
 Invalid: 0

Description

PHONE indicates the availability of a telephone in the dwelling.

Number of rooms (ROOMS)

File: KGZ1999-H-H

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 0-99

Valid cases: 0
 Invalid: 0

Description

ROOMS indicates the number of rooms occupied by the housing unit.

Bathing facilities (BATH)

File: KGZ1999-H-H

Overview

Type: Discrete
 Format: numeric
 Width: 1
 Decimals: 0
 Range: 0-9

Valid cases: 0
 Invalid: 0

Description

BATH indicates whether the household had access to bathing facilities and, in most cases, whether it had exclusive access.

Household classification (HHTYPE)

File: KGZ1999-H-H

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 0-99

Valid cases: 0
 Invalid: 0

Description

HHTYPE is a constructed variable that describes the composition of households.

HHTYPE is constructed from information in RELATE (relationship to head), from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father), and from information on group quarters status, GQ.

Number of families in household (NFAMS)

File: KGZ1999-H-H

Overview

Type: Discrete
 Format: numeric
 Width: 1
 Decimals: 0
 Range: 0-9

Valid cases: 0

Description

NFAMS is a constructed variable that indicates the number of families within each household. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and her servant contains two families; a household consisting of a large, multiple-generation extended family with no lodgers or servants would count as a single family.

NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.

Question 3p. Who is the owner of the dwelling?

When completing the answer to this question, the enumerator is to circle the code corresponding to one of prompts given. If households live in dwellings owned by citizens on a private property basis (privatized, built or acquired flats and houses, flats in housing cooperatives with fully paid equity contribution, flats in cooperatives of individual investors, flats and houses acquired on other terms), code 1 "individuals on a private property basis" is to be circled.

If a household lives in a dwelling which is owned by the Kyrgyz Republic or is under economic control or operational administration of government enterprises or institutions, code 2 "state ownership" is to be circled.

If a household lives in a dwelling related to communal property (owned by local government), which is under economic control or operational administration of communal enterprises, code 3 "communal ownership" is to be circled.

If households live in dwellings owned by legal entities (organized as private owners), built or bought at their expense, including at the expense of housing cooperatives with incompletely paid equity contribution, code 4 "other ownership" is to be circled.

In cases when a household rents a dwelling from persons living in detached houses, flats or rooms, code 5 "rents dwelling from individuals" is to be marked.

Code 6 is to be marked for homeless (tramps). Other questions of section II of the List of residents are neither asked of these persons nor completed.

Question 5p. The number of occupied living rooms

Completing this question, the enumerator is to enter in a specially dedicated box the number (e.g. 1, 2, 3, etc.) of living rooms occupied by the household.

In this connection, it should be noted that the living room is a premise intended for residence: part of a residential flat (hostel) separated from other premises (rooms) by partitions.

Attics, mezzanines, heated terraces and verandahs equipped for habitation the year round are to be included in the number of living rooms.

The number of living rooms does not cover: kitchens, halls, corridors, bath (or shower) rooms, storerooms, balconies, loggias, and other subsidiary premises.

If a household does not occupy the whole room, but only its part, code 99 "part of room" is to be marked.

If a household occupies two or more rooms, but some of those gives in rent, the total number of living rooms (including those rented) is to be recorded.

If a household rents living space, also the actual number of rooms or "part of room" (code 99) occupied is to be marked.

Question 6p. Floor space of the dwelling occupied (sq. m)

Completing the answer to this question, the enumerator is to record in a special box in integer numbers (without decimal digits) the number of square meters of useful and living floor space occupied by the household.

To round fractional space to integer numbers the following rules are to be observed: if there are five or more tenths after the decimal sign, then one is to be added to the integer part, if less than five tenths, then the fractional part is to be discarded. (e.g., numbers 23.50 or 23.51 are to be rounded to 24, but 23.49 to 23).

Useful floor space in a detached house, separate or common (communal) flat is determined as the sum of floor areas of all living rooms (including heated and appropriate for habitation attics, verandahs, terraces) and back rooms (kitchens, halls, anterooms, indoor corridors, bath (shower) rooms, toilets, pantries or built-in closets). Herewith in common (communal) flats the useful space of the whole flat is by convention to be only recorded for one household, which is specified first within this flat.

Useful floor space falling on residents in hostels is measured as the sum of the living space occupied by a household and its share of the back rooms space of the hostel. This part is calculated for one person by dividing the whole space of backrooms of the hostel by the number of beds. E.g., the floor space of backrooms in a hostel is 500 sq. m. and the number of beds is 100. In this case the share of the backroom space for one person is 5 sq. m.

The useful floor space does not include:

staircases, porches, lift lobbies, vestibules, corridors (excluding inner corridors), entrance halls;
built-on unheated rooms (terraces, verandahs, balconies, loggias, attics, mezzanines);
detached summer kitchens, bathhouses, sheds, pavilions, etc.

Living floor space includes the space of all living rooms occupied by a household excluding the space of built-in closets.

If a household occupies part of room, the space of this part is to be recorded (e.g., if the room is 24 sq. m in area and is occupied by two households consisting of 1 person and two persons, then 8 sq. m and 16 sq. m fall on each household respectively).

If a household gives part of the space occupied in rent, the total space, both useful and living, including that rented, is to be recorded for it.

If a household rents dwelling, the enumerator is also to record for it the actually occupied useful and living space.

If a household gives part of the space occupied in rent, the total space, both useful and living, including that rented, is to be recorded for it.

If a household rents dwelling, the enumerator is also to record for it the actually occupied useful and living space.

Interviewer instructions

Question 1p. Type of dwelling

Completing the answer to this question the enumerator is to circle the code corresponding to one of prompts given. Dwelling house is a permanent building for one, two or more flats intended for a long durability.

If one household occupies the whole one-flat house (irrespective of ownership), code 1 "individual (detached) house" is to be circled.

If two or more households live in such a house, code 2 "part of individual house" is to be circled for each household (even if the house is owned by one householder).

If the house comprises two or more flats, codes "separate flat" or "common (communal) flat" are to be marked according with the occupancy.

If one household occupies a separate flat, code 3 "separate flat" is to be circled.

Separate flat is considered a dwelling used and equipped for permanent residence, which consists of one or more living rooms separated from other rooms by main walls and has a separate exit to the staircase, common hall or passage or directly to the street or yard, if it is occupied by one household.

If more than one household live in a flat, code 4 "common (communal) flat" is to be marked (even in case of one tenancy account for the flat). This code is also used for households living in barracks and corridor-type houses which are not related to hostels.

If a household lives in an individual house or separate flat, but only occupies part of the floor space of the house or flat and gives the other part in rent, this household is considered to live in individual house or separate flat.

For households living in hostels for workers, clerks, students and pupils (irrespective of the type of building: flat-, corridor-, section- or barrack-type) code 5 "hostels" is to be marked.

Code 6 "boarding house for the aged and disables, infant house, children's home, etc." is to be circled for those aged, disabled and children in infant houses, children's homes, boarding schools for orphans and children left without parental care, etc.

Code 7 "other institutions" is to be marked for those living in barracks, prisons, monasteries, and other similar institutions.

For persons living in hotels, guest houses or motels code 8 "hotel" is to be marked.

If a household lives in a yurt, tent, van, hut or other similar building, code 9 "other residential premise" is to be marked.

Persons living in non-residential premises (garages, pantries, classrooms, kiosks, working rooms of institutions), stock buildings (farms) code 10 "non-residential premise used for living" is to be marked.

Question 2p. Facilities of dwelling

When answering to this question, the enumerator is to circle one or several codes corresponding to prompts provided.

A dwelling is considered to be equipped with:

electric lighting if there is electric wiring available;
 electric floor stove if there is an electric floor stove available. A house with a detached kitchen (capital building specially intended for kitchen) with an electric floor stove installed therein is also considered equipped with electric floor stove;
 network gas (natural), if there is a floor gas stove connected to the network;
 liquefied (bottled) gas, if there is a floor gas stove connected to the gas bottle;
 A house with a separate kitchen with a gas floor stove installed therein is also considered equipped with gas.
 It should be noted that premises with table electric or gas cooking appliances or trivets are not considered equipped with floor electric or gas stoves.
 heating from heating plant, district boiler-house if there is heating from a heating plant or collective (block of houses), district or building boiler-house available;
 heating from individual boilers if there are local small heating installations, heaters (radiators) or electric, gas, coal-fired, and oil-fired boilers, as well as other modern heating units;
 stove heating if heat is supplied from one or several stoves;
 running water if there is a supply net within the house, to which water is supplied centrally from the water pipe or artesian well the year round;

A house with a separate kitchen is also considered equipped with running water if a water tap connected to the water supply net is installed in the kitchen.

A house is not considered equipped with running water if there is a hydrant (a water pump) in the yard, but there is no water supply to the house.

sewage if there is a sewage installation inside the house for draining household and black waters to the street sewage net or adsorption wells. A dwelling is not considered equipped with sewage if there is no piped water or if it is equipped with a dry toilet;
 bath or shower if a bath or shower is installed both in a separate bathroom and in the other specially adapted room, irrespective of the way of hot water supply;
 A dwelling, in which a bath (shower) is installed but there is no sewage available, is not to be considered equipped with bath or shower.
 central hot water supply if there is a special central hot water supply intended for daily living needs of residents;
 hot water from individual boilers if there is a special water pipe supplying hot water from gas (or wood) water heaters, flat heaters including heating boilers of low capacity for daily living needs of residents.

If one or another facility of a dwelling is temporarily idle (because of repair, damage or other reasons), the dwelling is to be considered equipped with these types of facilities.

If there is none of the above-mentioned facilities in a dwelling, code 13 "no facilities" is to be marked.

Question 2p. Facilities of dwelling

When answering to this question, the enumerator is to circle one or several codes corresponding to prompts provided.

A dwelling is considered to be equipped with:

electric lighting if there is electric wiring available;
 electric floor stove if there is an electric floor stove available. A house with a detached kitchen (capital building specially intended for kitchen) with an electric floor stove installed therein is also considered equipped with electric floor stove;
 network gas (natural), if there is a floor gas stove connected to the network;
 liquefied (bottled) gas, if there is a floor gas stove connected to the gas bottle;
 A house with a separate kitchen with a gas floor stove installed therein is also considered equipped with gas.
 It should be noted that premises with table electric or gas cooking appliances or trivets are not considered equipped with floor electric or gas stoves.
 heating from heating plant, district boiler-house if there is heating from a heating plant or collective (block of houses), district or building boiler-house available;
 heating from individual boilers if there are local small heating installations, heaters (radiators) or electric, gas, coal-fired, and oil-fired boilers, as well as other modern heating units;
 stove heating if heat is supplied from one or several stoves;
 running water if there is a supply net within the house, to which water is supplied centrally from the water pipe or artesian well the year round;

A house with a separate kitchen is also considered equipped with running water if a water tap connected to the water supply net is installed in the kitchen.

A house is not considered equipped with running water if there is a hydrant (a water pump) in the yard, but there is no water supply to the house.

sewage if there is a sewage installation inside the house for draining household and black waters to the street sewage net or adsorption wells. A dwelling is not considered equipped with sewage if there is no piped water or if it is equipped with a dry toilet;

bath or shower if a bath or shower is installed both in a separate bathroom and in the other specially adapted room, irrespective of the way of hot water supply;

A dwelling, in which a bath (shower) is installed but there is no sewage available, is not to be considered equipped with bath or shower.

central hot water supply if there is a special central hot water supply intended for daily living needs of residents;

hot water from individual boilers if there is a special water pipe supplying hot water from gas (or wood) water heaters, flat heaters including heating boilers of low capacity for daily living needs of residents.

If one or another facility of a dwelling is temporarily idle (because of repair, damage or other reasons), the dwelling is to be considered equipped with these types of facilities.

If there is none of the above-mentioned facilities in a dwelling, code 13 "no facilities" is to be marked.

Question 2p. Facilities of dwelling

When answering to this question, the enumerator is to circle one or several codes corresponding to prompts provided.

A dwelling is considered to be equipped with:

electric lighting if there is electric wiring available;

electric floor stove if there is an electric floor stove available. A house with a detached kitchen (capital building specially intended for kitchen) with an electric floor stove installed therein is also considered equipped with electric floor stove;

network gas (natural), if there is a floor gas stove connected to the network;

liquefied (bottled) gas, if there is a floor gas stove connected to the gas bottle;

A house with a separate kitchen with a gas floor stove installed therein is also considered equipped with gas.

It should be noted that premises with table electric or gas cooking appliances or trivets are not considered equipped with floor electric or gas stoves.

heating from heating plant, district boiler-house if there is heating from a heating plant or collective (block of houses), district or building boiler-house available;

heating from individual boilers if there are local small heating installations, heaters (radiators) or electric, gas, coal-fired, and oil-fired boilers, as well as other modern heating units;

stove heating if heat is supplied from one or several stoves;

running water if there is a supply net within the house, to which water is supplied centrally from the water pipe or artesian well the year round;

A house with a separate kitchen is also considered equipped with running water if a water tap connected to the water supply net is installed in the kitchen.

A house is not considered equipped with running water if there is a hydrant (a water pump) in the yard, but there is no water supply to the house.

sewage if there is a sewage installation inside the house for draining household and black waters to the street sewage net or adsorption wells. A dwelling is not considered equipped with sewage if there is no piped water or if it is equipped with a dry toilet;

bath or shower if a bath or shower is installed both in a separate bathroom and in the other specially adapted room, irrespective of the way of hot water supply;

A dwelling, in which a bath (shower) is installed but there is no sewage available, is not to be considered equipped with bath or shower.

central hot water supply if there is a special central hot water supply intended for daily living needs of residents;

hot water from individual boilers if there is a special water pipe supplying hot water from gas (or wood) water heaters, flat heaters including heating boilers of low capacity for daily living needs of residents.

If one or another facility of a dwelling is temporarily idle (because of repair, damage or other reasons), the dwelling is to be considered equipped with these types of facilities.

If there is none of the above-mentioned facilities in a dwelling, code 13 "no facilities" is to be marked.

Strata (KG1999A_0059)

File: KGZ1999-H-H

Overview

Type: Continuous
 Format: numeric
 Width: 5
 Decimals: 0

Valid cases: 0
 Invalid: 0

Description

This variable is the strata identifier for the sample. Strata is a constructed variable that captures implicit geographic stratification resulting from the sample design. It is created by assigning a unique identifier to groups of between 10 and 19 adjacent households. Additional documentation is available on the Variance Estimation page.

Strata

Household weight (HHWT)

File: KGZ1999-H-H

Overview

Type: Continuous
 Format: numeric
 Width: 8
 Decimals: 2

Valid cases: 0
 Invalid: 0

Description

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

Kyrgyz Republic, Region 1999 - 2009 [Level 1; consistent boundaries, GIS] (GEO1_KG)

File: KGZ1999-H-H

Overview

Type: Discrete
 Format: numeric
 Width: 6
 Decimals: 0
 Range: 417001-417008

Valid cases: 0
 Invalid: 0

Description

GEO1_KG identifies the household's region (oblast) or city (shaar) within the Kyrgyz Republic in all sample years. Regions or cities are the first level administrative units of the country. GEO1_KG is spatially harmonized to account for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO1_KG can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Kyrgyz Republic can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

At the present moment, IPUMS International is only releasing integrated geography for the first level of geography for Kyrgyz Republic. Year specific geography and maps along with variables that are spatially harmonized at the second level of geography and account for political boundary changes across census years will become available in the near future.

Kyrgyz Republic, District 1999 - 2009 [Level 2; inconsistent boundaries, harmonized by name] (GEO2_KGX)

Description

GEO2_KGX identifies the district (rayon) within the Kyrgyz Republic in all sample years. Districts are the second level administrative units of the country, after states. GEO2_KGX is harmonized by name and does not account for boundary changes over time.

The full set of geography variables for the Kyrgyz Republic can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

Number of married couples in household (NCOUPLES)

File: KGZ1999-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

NCOUPLES is a constructed variable indicating the number of married/in-union couples within a household.

NCOUPLES is constructed using the IPUMS-International pointer variable SPLOC (spouse's location in the household).

Number of mothers in household (NMOTHERS)

File: KGZ1999-H-H

Overview

Type: Discrete

Description

HOTWATER indicates whether the housing unit had a water heater.

Strata identifier (STRATA)

File: KGZ1999-H-H

Overview

Type: Continuous
Format: numeric
Width: 12
Decimals: 0

Valid cases: 0
Invalid: 0

Description

This variable is the strata identifier for the sample. The STRATA variable provides information about the sample design that can be used to improve estimation.

Person number (PERNUM)

File: KGZ1999-P-H

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 0
Invalid: 0

Description

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

Mother's location in household (MOMLOC)

File: KGZ1999-P-H

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 0
Invalid: 0

Description

MOMLOC is a constructed variable that indicates whether or not the person's mother lived in the same household and, if so, gives the person number of the mother (see PERNUM). MOMLOC makes it easy for researchers to link the characteristics of children and their (probable) mothers.

The method by which probable child-mother links are identified is described in PARRULE.

The general design of MOMLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly.

Note: MOMLOC identifies social relationships (such as stepmother and adopted mother) as well as biological relationships. The variable STEPMOM is designed to identify some of these social relationships.

Father's location in household (POPLOC)

File: KGZ1999-P-H

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 0
Invalid: 0

Description

POPLOC is a constructed variable that indicates whether or not the person's father lived in the same household and, if so, gives the person number of the father (see PERNUM). POPLOC makes it easy for researchers to link the characteristics of children and their (probable) fathers.

The method by which probable child-father links are identified is described in PARRULE.

The general design of POPLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly.

Note: POPLOC identifies social relationships (such as stepfather and adopted father) as well as biological relationships. The variable STEPPPOP is designed to identify some of these social relationships.

Spouse's location in household (SPLOC)

File: KGZ1999-P-H

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 0
Invalid: 0

Description

SPLOC is a constructed variable that indicates whether or not the person's spouse lived in the same household and, if so, gives the person number (PERNUM) of the spouse. SPLOC makes it easy for researchers to link the characteristics of (probable) spouses.

The method by which probable spouse-spouse links are identified is described in SPRULE.

The general design of SPLOC and other constructed variables is modeled on the methods developed for IPUMS-USA "Family Interrelationships", but the details vary significantly.

Rule for linking parent (PARRULE)

File: KGZ1999-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-52

Valid cases: 0
Invalid: 0

Description

PARRULE describes the criteria by which the IPUMS-International variables MOMLOC and POPLOC linked the person to a probable mother and/or father.

IPUMS-International establishes child-parent links according to five basic rules, and PARRULE gives the number of the rule that applied to the link in question. A link to any parent automatically generates a second link to that parent's spouse or partner, so only one rule is needed to describe both MOMLOC and POPLOC.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

Rule for linking spouse (SPRULE)

File: KGZ1999-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-6

Valid cases: 0
Invalid: 0

Description

SPRULE explains the criteria by which the IPUMS-International variable SPLOC linked the person to his/her probable spouse.

IPUMS-International establishes spouse-spouse links according to five basic rules, and SPRULE gives the number of the rule that applied to the link in question. A sixth rule identifies sample-specific linking procedures only imposed in selected instances.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

Probable stepmother (STEPMOM)

File: KGZ1999-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-6

Valid cases: 0
Invalid: 0

Description

STEPMOM indicates whether a person's mother, as identified by MOMLOC, was most probably not the person's biological mother. Non-zero values of STEPMOM explain why it is probable that the person's mother was a step- or adopted mother. A value of 0 indicates no likely stepmother because (1) the mother identified in MOMLOC was probably the biological mother or (2) there is no mother of this person present in the household.

The codes for STEPMOM are as follows:

- 0 = Biological mother or no mother of this person present in household.
- 1 = Mother has no children borne or surviving.
- 2 = Child reports mother is deceased.
- 3 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner, stepchild/child-in-law).
- 4 = Mother reports no children in the home.
- 5 = Age difference between mother and child was less than 12 or greater than 54 years.
- 6 = Child exceeds known fertility of mother.

See PARRULE for a description of the linking process.

Users should note that there are many stepmothers and adopted mothers in the population that cannot be identified with information available in the censuses. Therefore, STEPMOM will always under-represent their actual number in the population.

Probable stepfather (STEPPOP)

File: KGZ1999-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-3

Valid cases: 0
Invalid: 0

Description

STEPPOP indicates whether a person's father, as identified by POPLOC, was most probably not the person's biological father. Non-zero values of STEPPOP explain why it is probable that the person's father was a step- or adopted father. A value of 0 indicates no likely stepfather because (1) the father identified in POPLOC was probably the biological father or (2) there is no father of this person present in the household.

The codes for STEPPOP are as follows:

- 0 = Biological father or no father of this person present in household.
- 1 = Child reports father is deceased.
- 2 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner; stepchild/child-in-law).
- 3 = Age difference between father and child was less than 12 or greater than 54 years.

See PARRULE for a description of the linking process.

Users should note that there are many stepfathers and adopted fathers in the population that cannot be identified with information available in the censuses. Therefore, STEPPOP will always under-represent their actual number in the population.

Man with more than one wife linked (POLYMAL)

File: KGZ1999-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-1

Valid cases: 0
Invalid: 0

Description

POLYMAL indicates if a man had more than one wife linked to him in the constructed IPUMS variable SPLOC -- Spouse's Location in Household.

The point of POLYMAL is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

Woman is second or higher order wife (POLY2ND)

File: KGZ1999-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-1

Valid cases: 0
Invalid: 0

Description

POLY2ND indicates if a woman was the second or higher order wife linked to a husband in the constructed IPUMS variable SPLOC -- Spouse's Location in Household. The variable does not suggest the actual marital order of wives, only their relative positions in the person order of the household as it was enumerated.

The point of POLY2ND is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

Family unit membership (FAMUNIT)

File: KGZ1999-P-H

Overview

Type: Continuous
Format: numeric
Width: 2
Decimals: 0

Valid cases: 0
Invalid: 0

Description

FAMUNIT is a constructed variable indicating to which family within the household a person belongs.

All persons related to the household head receive a 1 (see RELATE). Each secondary family or secondary individual receives a higher code. For purposes of FAMUNIT, secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

Number of own family members in household (FAMSIZE)

File: KGZ1999-P-H

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 1-99

Valid cases: 0
 Invalid: 0

Description

FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.

FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

File: KGZ1999-P-H

Overview

Type: Discrete
 Format: numeric
 Width: 1
 Decimals: 0
 Range: 0-9

Valid cases: 0

Description

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 1-99

Valid cases: 0
 Invalid: 0

Description

OCCISCO records the person's primary occupation, coded according to the major categories in the International Standard Classification of Occupations (ISCO) scheme for 1988. For someone with more than one job, the primary occupation is typically the one in which the person had spent the most time or earned the most money.

Occupation, unrecoded (OCC) File: KGZ1999-P-H

Overview

Type: Continuous
 Format: numeric
 Width: 4
 Decimals: 0

Valid cases: 0
 Invalid: 0

Description

OCC records the person's primary occupation, classified according to the system used by the respective national census office at the time. For someone with more than one job, the primary occupation is usually the one in which the person spent the most time or earned the most money, although this may not have been explicit in the instructions for a specific census.

To ensure confidentiality, very small occupations are recoded to a residual category indicating the persons had an occupation, but the job title is not identified. The number of cases recoded should be too small to affect analyses.

Overview

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 0-999

Valid cases: 0

Description

INDGEN recodes the industrial classifications of the various samples into twelve groups that can be fairly consistently identified across all available samples. The groupings roughly conform to the International Standard Industrial Classification (ISIC). The third digit of INDGEN retains important detail among the service industries that could not be consistently distinguished in all samples.

"Industry" refers to the activity or product of the establishment or sector in which a person worked.

Question 1. Relationship to the person recorded first in household

The code is to be circled which corresponds to one of the prompts given.

For the household member specified first within the household code 1 "person recorded first" is to be marked.

For all other household members corresponding codes are to be marked. For example, if a person questioned is a son of the first person, code 3 corresponding to the prompt "daughter, son" is to be marked. If a person questioned has kinship or in-law relationship to the person recorded first which is different from those listed (e.g., nephew), code 10 corresponding to the prompt "other relation degree" is to be marked.

If a household comprises one person, only code 1 "person recorded first" is to be circled.

Persons who are included in a given household, but are not related to any household member either by blood or by law (e.g., nanny or servant living in the household and contributing to it) are to be marked with code 11 "non-relative".

Code 11 "non-relative" is also marked for persons (other than person 1) permanently living in a collective household, excluding those related to each other by blood or law (e.g., husband and wife in a boarding house for the aged or invalids or brother and sister in a children's home) who are to be recorded according to the procedure mentioned above.

For each household member (regardless of the age and marital status) living in the same household with both parents or one of them, the serial number assigned to his (her) mother (related by blood or not) within the dwelling, i.e. the number indicated against her name in column 1 of the List of residents in dwelling is to be recorded. If there is no mother in the household, the number of father is to be entered. If there is neither mother nor father within the household, no number is to be recorded.

For temporary residents in question 1 code 1 "person recorded first" is to be circled, irrespective of the relation degree to permanent residents in this dwelling.

If two or more temporary residents are relatives, they are considered a household consisting of two or more persons. For one of them code 1 "person recorded first" is to be circled and other members are marked with codes corresponding to their relation degree.

In the answer about the mother tongue, the language is to be recorded, which the person questioned recognizes as his/her native.

If a person finds difficult to name his/her mother tongue, the language best spoken by the person or usually used by his/her household is to be recorded.

For children who can not speak yet and other young children the mother tongue is to be determined by their parents. If parents find difficulty in determining the mother tongue of their child, the language usually spoken in the household is to be recorded.

The mother tongue of those deaf and dumb is considered the language in which they read and write or the language used by the members of their household or persons they mainly speak to at home.

After the mother tongue of the person questioned has been entered, for persons having a perfect command of other languages, i.e. being able to read, write and fluently speak in these languages, the names of those language are to be recorded accordingly (e.g., Ukrainian, English, Spanish, Russian, etc.)

☐ 4 From rural

d) Are you a refugee?

☐ 5 Yes

☐ 6 No

Interviewer instructions

Question 9. Has the person permanently been living in this settlement since birth?

Question 9 is neither asked of those temporary residents nor completed.

Code 1 "Yes" is to be encircled for persons that have continuously been living in this settlement since birth, in which case the continuity of residence is not considered broken by:

move from one rural settlement to another within the same administrative district or move from one district of the city of Bishkek to another one;
departure from this settlement for compulsory military service or business trip;
all departures from this settlement not connected with the change of permanent place of residence.

Continuity of residence does not depend on the registration or its character (permanent or temporary) and is not considered broken by changing the address within the same administrative district.

If the answer is "Yes", the enumerator is to go to question 10.

Code 2 "No" is to be circled for persons living in this settlement not since birth, those inclusive who were born here, but moved from this settlement for permanent residence to other administrative district.

For persons who changed their place of residence the following data are to be completed in special boxes:

a) since which year have you been permanently live here, i.e. in this settlement? For persons (both born here and those living here not since birth) who moved from this settlement for permanent residence to other places, the year since which they have permanently been living here after return, is to be indicated;

b) previous place of residence: the name of city or district in the Kyrgyz Republic or the name of the country of near or far abroad is to be entered, e.g., the city of Naryn, the city of Osh, Solokukski district, Russia, Ukraine, etc.

c) what settlement have you come from?

If a person questioned has come from a city or urban type settlement, code 3 "urban" is to be marked; if from a rural locality, code 4 "rural" should be labeled. In this case, the administrative-territorial changes taking place after the move of the person from his/her previous place of permanent residence are not to be taken into account.

d) are you a refugee or a forced migrant?

This question is to be only asked of persons who changed their place of residence in the period from 1989 to March 1999.

Code 5 "Yes" is to be marked for persons who as a result of exacerbation of interethnic relations or armed conflicts in the territory of their residence were forced to change their permanent place of residence because violence was committed to them or members of their families or there was a jeopardy for them to be persecuted because of national identity, confession, language, and also because of social identity or political opinions.

Code 6 "No" is to be used for persons who changed the place of their permanent residence for any other reason, e.g., because of arrival for training or new place of employment, for family or other similar reasons.

move from one rural settlement to another within the same administrative district or move from one district of the city of Bishkek to another one;

departure from this settlement for compulsory military service or business trip;

all departures from this settlement not connected with the change of permanent place of residence.

Continuity of residence does not depend on the registration or its character (permanent or temporary) and is not considered broken by changing the address within the same administrative district.

If the answer is "Yes", the enumerator is to go to question 10.

Code 2 "No" is to be circled for persons living in this settlement not since birth, those inclusive who were born here, but moved from this settlement for permanent residence to other administrative district.

For persons who changed their place of residence the following data are to be completed in special boxes:

a) since which year have you been permanently live here, i.e. in this settlement? For persons (both born here and those living here not since birth) who moved from this settlement for permanent residence to other places, the year since which they have permanently been living here after return, is to be indicated;

b) previous place of residence: the name of city or district in the Kyrgyz Republic or the name of the country of near or far abroad is to be entered, e.g., the city of Naryn, the city of Osh, Solokukski district, Russia, Ukraine, etc.

c) what settlement have you come from?

If a person questioned has come from a city or urban type settlement, code 3 "urban" is to be marked; if from a rural locality, code 4 "rural" should be labeled. In this case, the administrative-territorial changes taking place after the move of the person from his/her previous place of permanent residence are not to be taken into account.

d) are you a refugee or a forced migrant?

This question is to be only asked of persons who changed their place of residence in the period from 1989 to March 1999.

Code 5 "Yes" is to be marked for persons who as a result of exacerbation of interethnic relations or armed conflicts in the territory of their residence were forced to change their permanent place of residence because violence was committed to them or members of their families or there was a jeopardy for them to be persecuted because of national identity, confession, language, and also because of social identity or political opinions.

Code 6 "No" is to be used for persons who changed the place of their permanent residence for any other reason, e.g., because of arrival for training or new place of employment, for family or other similar reasons.

Question 10. Marital status

This question is usually asked of persons aged 15 years and over, in which case the code corresponding to one of the prompts given is to be circled.

Code 1 "Never married" is to be circled for persons who never were in a registered or in a common law (unregistered) marriage.

Code 2 "Registered marriage" is to be circled for persons presently married, with their marriage being registered with the Civil Registry Office.

Code 3 "Unregistered marriage" (common law marriage) is to be encircled for persons presently married without registration with the Civil Registry Office.

Code 4 "Widowed" is to be encircled for persons who were married earlier (whether their marriage registered or not), but whose marriage stopped because of the death of the spouse and who have not remarried.

Code 5 "Divorced" is to be encircled for persons who were earlier in a registered marriage, but at the moment are unmarried with their divorce being registered with the Civil Registry Office.

Code 6 "Separated" is to be encircled for persons who were earlier in a registered marriage, but at the moment are unmarried and do not jointly keep the house, with their divorce not registered yet with the registry office, as well as for persons who were earlier in unregistered marriage, but at the moment has been separated.

For those married (codes 2 or 3) the serial number under which his wife (husband) is recorded within the dwelling is to be entered in a special box, i.e. the number specified against her/his name in column 1 of the List of residents in dwelling if the wife (husband) is a permanent resident in this household.

For persons under 15 years of age the answer to this question is usually not completed. Only if a person questioned does insist on his/her marriage, the corresponding code should be marked.

Question 11. Education

This question is asked of persons aged 6 years and over, in which case the code corresponding to one of the prompts given is to be circled.

Code 1 "Higher" is to be marked for those graduated from higher education institutions (university, institute, academy) and holding a diploma.

Code 2 "Incomplete higher" is to be marked for persons who attend now or attended earlier higher education establishments and completed half or more of a basic programme of higher education.

For persons who completed in a higher education establishment less than half of educational programme, the educational attainment they had before the higher education establishment is to be marked, i.e. "secondary general" or "secondary specialized".

Code 3 "Secondary specialized" is to be marked for those who graduated from secondary specialized education establishments: technical school, training school (medical, musical, art, trade and culinary, etc.) and received a diploma.

Code 4 "Secondary general" is to be encircled for those who graduated from secondary general education schools (including those with in-depth study of some subjects), gymnasias, lyceums, etc. and received a certificate of secondary general education.

When circling codes for the educational levels "Basic general" - Code 5 (i.e. incomplete secondary) and "Primary general" - Code 6 (i.e. primary), it is expedient to use the table given in Annex 2.

Code 7 "No primary general" is to be circled for persons aged 6 years and over (both pupils and not) who have no primary education but can read and write or only read (even if slowly).

Code 8 "Illiterate" is to be circled for persons aged 6 years and over who can not read.

If when completing enumeration forms the enumerator comes across illiterate persons aged 9-49 years, he/she should record data on those in Form 5.

Code 9 "Have you graduated from vocational school?" is to be circled for persons graduated from secondary or other vocational-technical school (industrial school, specialized industrial and technical school), sectoral vocational school, factory apprenticeship school, and technical school. For persons who graduated from a vocational school and received a certificate of secondary education, code 4 "Secondary general" is also to be marked.

For persons attending now or graduated from religious educational establishments the code corresponding to the educational level attained is to be marked.

For students and graduates of educational establishments not providing general education (e.g., refresher courses, professional development courses, access courses at educational institutions, accounting courses, etc.) the educational attainment is to be recorded, which was achieved before the admission to those educational establishments.

Graduation from correspondence or evening educational establishments, as well as externship, is assimilated with the graduation from relevant educational establishments.

If the enumerator finds difficult to determine the educational attainment, he/she should note on a clear part the name of the educational establishment the person in question graduated from, how many grades he/she completed and in which year.

This question is not to be completed for children under 6 years of age.

For persons having higher education (Code 1), incomplete higher (Code 2) or secondary specialized education (Code 3) the qualification given as a result of graduation from the relevant educational establishment is to be recorded in a specially dedicated place. If a person graduated from two or more educational establishments and received different occupations, the qualification given after graduation from the last educational establishment is to be recorded for him/her.

Qualification is not to be indicated for persons with incomplete higher education (Question 11, Code 2) who continue training in a higher educational establishment (Question 12, Code 1).

This question is not to be completed for persons without higher, incomplete higher or secondary special education.

For persons having an academic degree the relevant code is to be entered: Code 10 "Candidate of Science" or Code 11 "Doctor of Science".

- ☐ 4 General educational institution of all types
- ☐ 5 Other school (courses)
- ☐ 6 Not attending

Interviewer instructions

Question 12. Type of educational establishment you are attending

For persons aged 6 years and over, students of all day-time, evening or correspondence educational establishments (both state-owned and non-state) and courses the code corresponding to one of the prompts given is to be circled.

Code 1 "higher education establishment" is to be marked for students of higher education establishments: institutes, academies, universities, etc.

Code 2 "secondary specialized education establishment" is to be marked for students of technical schools (specialized schools), colleges, technical schools at enterprises, etc.

Code 3 "vocational-technical education establishment" is to be marked for students of vocational schools, vocational lyceums, continuous vocational training centres, technical schools, industrial schools, specialized trade schools, etc.

Code 4 "general educational establishments of all types" is to be marked for pupils of primary, basic, secondary general education schools, (including those with in-depth study of selected subjects), lyceums, gymnasiums, etc.

Code 5 "other school (courses)" is to be marked for pupils of schools and courses not providing general education (retraining or professional improvement courses, preparatory courses at educational establishments), as well as courses providing vocational training (driving schools, courses for bookkeepers, translators, secretaries, etc.).

For persons concurrently attending two educational establishments the highest in status and type establishment is to be marked.

Code 6 "not attending" is to be marked for persons aged 6 years and over not attending any educational establishment and also for those attending circles (needlework, photography) irrespective of the duration of training. If in the course of enumeration the enumerator comes across children at the age of 7-15 years not attending any educational establishment, data on them are to be recorded in the Annex to Form 5.

For persons attending religious educational establishments, irrespective of their affiliation or subordination, the code corresponding to the type of educational establishment is to be marked.

For children under 6 years of age this question is not to be completed.

Question 14. Sources of livelihood

Before asking this question a person interviewed is to be given a card with all sources of livelihood listed. After the list has been studied, the person is to name one or several sources of livelihood out of those listed. Based on the answer the enumerator is to circle codes corresponding to one or several responses given.

After this the enumerator is to question the person about the main source of livelihood, which is to be named by the person him/herself.

If a person questioned names only one source of livelihood, the code corresponding to this source is to be entered in a special box as main.

If a person questioned names several sources of livelihood, it should be cleared up which of the sources named he/she considers the main one and the code of this source is to be entered in a special box.

Any of sources listed on the card can be named as main if:

- compensation or income is higher than in other sources of livelihood;
- income is permanent;
- on an equal level, the source with most days worked is to be preferred.

The category of those having work, both as employees and self-employed, covers persons who at the moment of census:

- performed work, whether it was a permanent, temporary, seasonal or other paid work, as well as worked for profit as self-employed, alone or with one or a few partners, both engaging or not engaging employees, irrespective of the dates of receiving a direct payment or profit for their work;
- worked without payment in their family business or on their family farm;
- were temporarily absent from work, but kept formal attachment to their work.

The following is to be considered as temporary absence from work:

- illness or injury, care for sick persons;
- annual leave or weekend, compensatory leave or time-off, compensation of overtime or work on a public holiday;
- statutory maternity and child-care leave;
- educational leave;
- unpaid or paid leave on the initiative of administration;
- rotational, seasonal or other specialized mode of operation;
- strike action;
- other reasons.

Besides, the category of persons with employment includes people engaged in spring, summer or autumn to perform seasonal work (e.g., in agriculture, water transport, fishery, etc.).

Students and pensioners having employment or gainful business are to be referred to those employed or self-employed on the same ground as other categories of persons.

The activity of persons engaged in non-reimbursable public or voluntary works is not to be marked as a source of livelihood.

Employees (those working under a written labour contract or verbal agreement) cover persons that concluded with the administration of an enterprise, organization, institution of any ownership or with a private employer a written labour contract or verbal agreement about working conditions and receive emolument (in cash or in kind). The following codes are used for this category:

Code 1 "At enterprise, organization, institution" is to be marked for those employed at enterprises, organizations, institutions of any ownership (e.g. at a state-owned or communal enterprise, joint-stock company, private or joint venture, public or religious organization, fund, production cooperative, etc.); as well as for paid apprentices.

Code 1 "At enterprise, organization, institution" is also to be marked as a source of livelihood for all military servicemen (other than army conscripts), wage and salary workers of military units living outside closed territories.

Code 2 "On a farm" is to be marked for persons employed in farming (peasant) enterprises and receiving remuneration for their labour (both in cash and in kind).

Code 3 "For individuals (including those rendering household services)" is to be marked for persons employed on an individual basis by individuals (e.g. salesmen, vendors) or those rendering household services for payment in cash or in kind (e.g., cooks, tutors, drivers, baby-sitters, etc.)

Self-employed include persons who work at their own working place or enterprise for making profit or family income in cash or in kind, and also for persons who own their business but do not temporarily work for any reason. The following codes are used in this category:

Code 4 "Owner of enterprise, farm (employer)" is to be marked for persons working on their own account or with partners and engaging one or more employees.

Code 5 "On an individual basis" is to be marked for self-employed persons engaged in individual professional or commercial activity.

Code 6 "Unpaid family worker at family enterprise or farm" is to be marked for persons working without compensation on a family farm or at an enterprise owned by relatives.

Code 7 "At personal subsidiary plot" is to be marked for people carrying out in their personal subsidiary plots (including gardens, kitchen gardens, country house plots, etc.) agricultural works and livestock management. This source of livelihood is to be marked not only for persons engaged in production of agricultural products for sale, but also for those producing agricultural products for own consumption if this kind of activity provides a considerable contribution to the total household consumption.

Code 8 "Scholarship" is to be marked for students receiving scholarships (including scholarships paid to students detached by enterprises, organizations, or employment services).

Code 9 "Pension" is to be marked for persons receiving old age or retirement, disability, survivor's, and long service pensions. It should be borne in mind that "pension" is to be marked for persons whom it is granted, but not for those who actually receive it. So the survivor's pension granted to children is to be marked for children, but not for their mother or father, even if they are actual recipients.

Code 10 "Benefit (other than unemployment benefit)" is to be marked for persons receiving:

- common monthly low-income family/citizens benefit, which is assigned to: children under 16 years of age and pupils of general education schools up to completion of training, but not after the attainment of the age of 18 years; pupils of basic vocational schools, students of secondary and higher education establishments up to the attainment of the age of 21 years; nonworking pensioners; disabled persons;
- one-time maternity grant;
- benefit to mothers giving birth to twins (triplets or more children);
- benefit to nonworking mothers with children under 1.5 years of age;
- monthly social benefit assigned to:

handicapped children, children having infantile cerebral paralysis, children HIV-positive or sick with AIDS; those disabled, the aged, mother-heroes, children in the case of loss of breadwinner if these categories of citizens are not entitled to pension. It should be noted that "benefit" is to be marked for persons whom it is granted, but not for those who actually receive it.

Code 11 "Unemployment benefit" is to be marked for persons registered with the employment services as unemployed and who are recipients of unemployment benefits.

Code 12 "Other government support" is to be encircled for inmates of infant's homes, children's homes, boarding schools, boarding houses for the aged and invalids and similar persons supported by governmental and non-governmental organizations.

Code 13 "Property income" is to be encircled for persons gaining income in the form of interest on their money deposits, credits, loans, equities, shares, as dividends or difference in rates, and for persons gaining income in the form of rent for housing, storage and other space, cars, instruments of labour, and land.

Code 14 "Dependent" is to be encircled for persons, living at the expense of relatives or other people, as well as for persons receiving alimony.

Code 15 "Other source" is to be encircled for persons having other sources of livelihood than those listed above. For example, personal or family savings, income of clergymen, casual earnings, charity, humanitarian aid, support of religious organizations, etc.

Code 1 "At enterprise, organization, institution" is also to be marked as a source of livelihood for all military servicemen (other than army conscripts), wage and salary workers of military units living outside closed territories.

Code 2 "On a farm" is to be marked for persons employed in farming (peasant) enterprises and receiving remuneration for their labour (both in cash and in kind).

Code 3 "For individuals (including those rendering household services)" is to be marked for persons employed on an individual basis by individuals (e.g. salesmen, vendors) or those rendering household services for payment in cash or in kind (e.g., cooks, tutors, drivers, baby-sitters, etc.)

Self-employed include persons who work at their own working place or enterprise for making profit or family income in cash or in kind, and also for persons who own their business but do not temporarily work for any reason. The following codes are used in this category:

Code 4 "Owner of enterprise, farm (employer)" is to be marked for persons working on their own account or with partners and engaging one or more employees.

Code 5 "On an individual basis" is to be marked for self-employed persons engaged in individual professional or commercial activity.

Code 6 "Unpaid family worker at family enterprise or farm" is to be marked for persons working without compensation on a family farm or at an enterprise owned by relatives.

Code 7 "At personal subsidiary plot" is to be marked for people carrying out in their personal subsidiary plots (including gardens, kitchen gardens, country house plots, etc.) agricultural works and livestock management. This source of livelihood is to be marked not only for persons engaged in production of agricultural products for sale, but also for those producing agricultural products for own consumption if this kind of activity provides a considerable contribution to the total household consumption.

Code 8 "Scholarship" is to be marked for students receiving scholarships (including scholarships paid to students detached by enterprises, organizations, or employment services).

Code 9 "Pension" is to be marked for persons receiving old age or retirement, disability, survivor's, and long service pensions. It should be borne in mind that "pension" is to be marked for persons whom it is granted, but not for those who actually receive it. So the survivor's pension granted to children is to be marked for children, but not for their mother or father, even if they are actual recipients.

Code 10 "Benefit (other than unemployment benefit)" is to be marked for persons receiving:

- common monthly low-income family/citizens benefit, which is assigned to: children under 16 years of age and pupils of general education schools up to completion of training, but not after the attainment of the age of 18 years; pupils of basic vocational schools, students of secondary and higher education establishments up to the attainment of the age of 21 years; nonworking pensioners; disabled persons;
- one-time maternity grant;
- benefit to mothers giving birth to twins (triplets or more children);
- benefit to nonworking mothers with children under 1.5 years of age;
- monthly social benefit assigned to:

handicapped children, children having infantile cerebral paralysis, children HIV-positive or sick with AIDS; those disabled, the aged, mother-heroes, children in the case of loss of breadwinner if these categories of citizens are not entitled to pension. It should be noted that "benefit" is to be marked for persons whom it is granted, but not for those who actually receive it.

Code 11 "Unemployment benefit" is to be marked for persons registered with the employment services as unemployed and who are recipients of unemployment benefits.

Code 12 "Other government support" is to be encircled for inmates of infant's homes, children's homes, boarding schools, boarding houses for the aged and invalids and similar persons supported by governmental and non-governmental organizations.

Code 13 "Property income" is to be encircled for persons gaining income in the form of interest on their money deposits, credits, loans, equities, shares, as dividends or difference in rates, and for persons gaining income in the form of rent for housing, storage and other space, cars, instruments of labour, and land.

Code 14 "Dependent" is to be encircled for persons, living at the expense of relatives or other people, as well as for persons receiving alimony.

Code 15 "Other source" is to be encircled for persons having other sources of livelihood than those listed above. For example, personal or family savings, income of clergymen, casual earnings, charity, humanitarian aid, support of religious organizations, etc.

Question 14. Sources of livelihood

Before asking this question a person interviewed is to be given a card with all sources of livelihood listed. After the list has been studied, the person is to name one or several sources of livelihood out of those listed. Based on the answer the enumerator is to circle codes corresponding to one or several responses given.

After this the enumerator is to question the person about the main source of livelihood, which is to be named by the person him/herself.

If a person questioned names only one source of livelihood, the code corresponding to this source is to be entered in a special box as main.

If a person questioned names several sources of livelihood, it should be cleared up which of the sources named he/she considers the main one and the code of this source is to be entered in a special box.

Any of sources listed on the card can be named as main if:

- compensation or income is higher than in other sources of livelihood;
- income is permanent;
- on an equal level, the source with most days worked is to be preferred.

The category of those having work, both as employees and self-employed, covers persons who at the moment of census:

- performed work, whether it was a permanent, temporary, seasonal or other paid work, as well as worked for profit as self-employed, alone or with one or a few partners, both engaging or not engaging employees, irrespective of the dates of receiving a direct payment or profit for their work;
- worked without payment in their family business or on their family farm;
- were temporarily absent from work, but kept formal attachment to their work.

The following is to be considered as temporary absence from work:

- illness or injury, care for sick persons;
- annual leave or weekend, compensatory leave or time-off, compensation of overtime or work on a public holiday;
- statutory maternity and child-care leave;
- educational leave;
- unpaid or paid leave on the initiative of administration;
- rotational, seasonal or other specialized mode of operation;
- strike action;
- other reasons.

Besides, the category of persons with employment includes people engaged in spring, summer or autumn to perform seasonal work (e.g., in agriculture, water transport, fishery, etc.).

Students and pensioners having employment or gainful business are to be referred to those employed or self-employed on the same ground as other categories of persons.

The activity of persons engaged in non-reimbursable public or voluntary works is not to be marked as a source of livelihood.

Employees (those working under a written labour contract or verbal agreement) cover persons that concluded with the administration of an enterprise, organization, institution of any ownership or with a private employer a written labour contract or verbal agreement about working conditions and receive emolument (in cash or in kind). The following codes are used for this category:

Code 1 "At enterprise, organization, institution" is to be marked for those employed at enterprises, organizations, institutions of any ownership (e.g. at a state-owned or communal enterprise, joint-stock company, private or joint venture, public or religious organization, fund, production cooperative, etc.); as well as for paid apprentices.

Code 1 "At enterprise, organization, institution" is also to be marked as a source of livelihood for all military servicemen (other than army conscripts), wage and salary workers of military units living outside closed territories.

Code 2 "On a farm" is to be marked for persons employed in farming (peasant) enterprises and receiving remuneration for their labour (both in cash and in kind).

Code 3 "For individuals (including those rendering household services)" is to be marked for persons employed on an individual basis by individuals (e.g. salesmen, vendors) or those rendering household services for payment in cash or in kind (e.g., cooks, tutors, drivers, baby-sitters, etc.)

Students and pensioners having employment or gainful business are to be referred to those employed or self-employed on the same ground as other categories of persons.

The activity of persons engaged in non-reimbursable public or voluntary works is not to be marked as a source of livelihood.

Employees (those working under a written labour contract or verbal agreement) cover persons that concluded with the administration of an enterprise, organization, institution of any ownership or with a private employer a written labour contract or verbal agreement about working conditions and receive emolument (in cash or in kind). The following codes are used for this category:

Code 1 "At enterprise, organization, institution" is to be marked for those employed at enterprises, organizations, institutions of any ownership (e.g. at a state-owned or communal enterprise, joint-stock company, private or joint venture, public or religious organization, fund, production cooperative, etc.); as well as for paid apprentices.

Code 1 "At enterprise, organization, institution" is also to be marked as a source of livelihood for all military servicemen (other than army conscripts), wage and salary workers of military units living outside closed territories.

Code 2 "On a farm" is to be marked for persons employed in farming (peasant) enterprises and receiving remuneration for their labour (both in cash and in kind).

Code 3 "For individuals (including those rendering household services)" is to be marked for persons employed on an individual basis by individuals (e.g. salesmen, vendors) or those rendering household services for payment in cash or in kind (e.g., cooks, tutors, drivers, baby-sitters, etc.)

Self-employed include persons who work at their own working place or enterprise for making profit or family income in cash or in kind, and also for persons who own their business but do not temporarily work for any reason. The following codes are used in this category:

Code 4 "Owner of enterprise, farm (employer)" is to be marked for persons working on their own account or with partners and engaging one or more employees.

Code 5 "On an individual basis" is to be marked for self-employed persons engaged in individual professional or commercial activity.

Code 6 "Unpaid family worker at family enterprise or farm" is to be marked for persons working without compensation on a family farm or at an enterprise owned by relatives.

Code 7 "At personal subsidiary plot" is to be marked for people carrying out in their personal subsidiary plots (including gardens, kitchen gardens, country house plots, etc.) agricultural works and livestock management. This source of livelihood is to be marked not only for persons engaged in production of agricultural products for sale, but also for those producing agricultural products for own consumption if this kind of activity provides a considerable contribution to the total household consumption.

Code 8 "Scholarship" is to be marked for students receiving scholarships (including scholarships paid to students detached by enterprises, organizations, or employment services).

Code 9 "Pension" is to be marked for persons receiving old age or retirement, disability, survivor's, and long service pensions. It should be borne in mind that "pension" is to be marked for persons whom it is granted, but not for those who actually receive it. So the survivor's pension granted to children is to be marked for children, but not for their mother or father, even if they are actual recipients.

Code 10 "Benefit (other than unemployment benefit)" is to be marked for persons receiving:

- common monthly low-income family/citizens benefit, which is assigned to: children under 16 years of age and pupils of general education schools up to completion of training, but not after the attainment of the age of 18 years; pupils of basic vocational schools, students of secondary and higher education establishments up to the attainment of the age of 21 years; nonworking pensioners; disabled persons;
- one-time maternity grant;
- benefit to mothers giving birth to twins (triplets or more children);
- benefit to nonworking mothers with children under 1.5 years of age;
- monthly social benefit assigned to:

handicapped children, children having infantile cerebral paralysis, children HIV-positive or sick with AIDS; those disabled, the aged, mother-heroes, children in the case of loss of breadwinner if these categories of citizens are not entitled to pension. It should be noted that "benefit" is to be marked for persons whom it is granted, but not for those who actually receive it.

Code 11 "Unemployment benefit" is to be marked for persons registered with the employment services as unemployed and who are recipients of unemployment benefits.

Code 12 "Other government support" is to be encircled for inmates of infant's homes, children's homes, boarding schools, boarding houses for the aged and invalids and similar persons supported by governmental and non-governmental organizations.

Code 13 "Property income" is to be encircled for persons gaining income in the form of interest on their money deposits, credits, loans, equities, shares, as dividends or difference in rates, and for persons gaining income in the form of rent for housing, storage and other space, cars, instruments of labour, and land.

Code 14 "Dependent" is to be encircled for persons, living at the expense of relatives or other people, as well as for persons receiving alimony.

Code 15 "Other source" is to be encircled for persons having other sources of livelihood than those listed above. For example, personal or family savings, income of clergymen, casual earnings, charity, humanitarian aid, support of religious organizations, etc.

Question 14. Sources of livelihood

Before asking this question a person interviewed is to be given a card with all sources of livelihood listed. After the list has been studied, the person is to name one or several sources of livelihood out of those listed. Based on the answer the enumerator is to circle codes corresponding to one or several responses given.

After this the enumerator is to question the person about the main source of livelihood, which is to be named by the person him/herself.

If a person questioned names only one source of livelihood, the code corresponding to this source is to be entered in a special box as main.

If a person questioned names several sources of livelihood, it should be cleared up which of the sources named he/she considers the main one and the code of this source is to be entered in a special box.

Any of sources listed on the card can be named as main if:

- compensation or income is higher than in other sources of livelihood;
- income is permanent;
- on an equal level, the source with most days worked is to be preferred.

The category of those having work, both as employees and self-employed, covers persons who at the moment of census:

- performed work, whether it was a permanent, temporary, seasonal or other paid work, as well as worked for profit as self-employed, alone or with one or a few partners, both engaging or not engaging employees, irrespective of the dates of receiving a direct payment or profit for their work;
- worked without payment in their family business or on their family farm;
- were temporarily absent from work, but kept formal attachment to their work.

The following is to be considered as temporary absence from work:

- illness or injury, care for sick persons;
- annual leave or weekend, compensatory leave or time-off, compensation of overtime or work on a public holiday;
- statutory maternity and child-care leave;
- educational leave;
- unpaid or paid leave on the initiative of administration;
- rotational, seasonal or other specialized mode of operation;
- strike action;
- other reasons.

Besides, the category of persons with employment includes people engaged in spring, summer or autumn to perform seasonal work (e.g., in agriculture, water transport, fishery, etc.).

Students and pensioners having employment or gainful business are to be referred to those employed or self-employed on the same ground as other categories of persons.

The activity of persons engaged in non-reimbursable public or voluntary works is not to be marked as a source of livelihood.

- illness or injury, care for sick persons;
- annual leave or weekend, compensatory leave or time-off, compensation of overtime or work on a public holiday;
- statutory maternity and child-care leave;
- educational leave;
- unpaid or paid leave on the initiative of administration;
- rotational, seasonal or other specialized mode of operation;
- strike action;
- other reasons.

Besides, the category of persons with employment includes people engaged in spring, summer or autumn to perform seasonal work (e.g., in agriculture, water transport, fishery, etc.).

Students and pensioners having employment or gainful business are to be referred to those employed or self-employed on the same ground as other categories of persons.

The activity of persons engaged in non-reimbursable public or voluntary works is not to be marked as a source of livelihood.

Employees (those working under a written labour contract or verbal agreement) cover persons that concluded with the administration of an enterprise, organization, institution of any ownership or with a private employer a written labour contract or verbal agreement about working conditions and receive emolument (in cash or in kind). The following codes are used for this category:

Code 1 "At enterprise, organization, institution" is to be marked for those employed at enterprises, organizations, institutions of any ownership (e.g. at a state-owned or communal enterprise, joint-stock company, private or joint venture, public or religious organization, fund, production cooperative, etc.); as well as for paid apprentices.

Code 1 "At enterprise, organization, institution" is also to be marked as a source of livelihood for all military servicemen (other than army conscripts), wage and salary workers of military units living outside closed territories.

Code 2 "On a farm" is to be marked for persons employed in farming (peasant) enterprises and receiving remuneration for their labour (both in cash and in kind).

Code 3 "For individuals (including those rendering household services)" is to be marked for persons employed on an individual basis by individuals (e.g. salesmen, vendors) or those rendering household services for payment in cash or in kind (e.g., cooks, tutors, drivers, baby-sitters, etc.)

Self-employed include persons who work at their own working place or enterprise for making profit or family income in cash or in kind, and also for persons who own their business but do not temporarily work for any reason. The following codes are used in this category:

Code 4 "Owner of enterprise, farm (employer)" is to be marked for persons working on their own account or with partners and engaging one or more employees.

Code 5 "On an individual basis" is to be marked for self-employed persons engaged in individual professional or commercial activity.

Code 6 "Unpaid family worker at family enterprise or farm" is to be marked for persons working without compensation on a family farm or at an enterprise owned by relatives.

Code 7 "At personal subsidiary plot" is to be marked for people carrying out in their personal subsidiary plots (including gardens, kitchen gardens, country house plots, etc.) agricultural works and livestock management. This source of livelihood is to be marked not only for persons engaged in production of agricultural products for sale, but also for those producing agricultural products for own consumption if this kind of activity provides a considerable contribution to the total household consumption.

Code 8 "Scholarship" is to be marked for students receiving scholarships (including scholarships paid to students detached by enterprises, organizations, or employment services).

Code 9 "Pension" is to be marked for persons receiving old age or retirement, disability, survivor's, and long service pensions. It should be borne in mind that "pension" is to be marked for persons whom it is granted, but not for those who actually receive it. So the survivor's pension granted to children is to be marked for children, but not for their mother or father, even if they are actual recipients.

Code 10 "Benefit (other than unemployment benefit)" is to be marked for persons receiving:

- common monthly low-income family/citizens benefit, which is assigned to: children under 16 years of age and pupils of general education schools up to completion of training, but not after the attainment of the age of 18 years; pupils of basic vocational schools, students of secondary and higher education establishments up to the attainment of the age of 21 years; nonworking pensioners; disabled persons;
- one-time maternity grant;
- benefit to mothers giving birth to twins (triplets or more children);
- benefit to nonworking mothers with children under 1.5 years of age;
- monthly social benefit assigned to:

handicapped children, children having infantile cerebral paralysis, children HIV-positive or sick with AIDS; those disabled, the aged, mother-heroes, children in the case of loss of breadwinner if these categories of citizens are not entitled to pension. It should be noted that "benefit" is to be marked for persons whom it is granted, but not for those who actually receive it.

Code 11 "Unemployment benefit" is to be marked for persons registered with the employment services as unemployed and who are recipients of unemployment benefits.

Code 12 "Other government support" is to be encircled for inmates of infant's homes, children's homes, boarding schools, boarding houses for the aged and invalids and similar persons supported by governmental and non-governmental organizations.

Code 13 "Property income" is to be encircled for persons gaining income in the form of interest on their money deposits, credits, loans, equities, shares, as dividends or difference in rates, and for persons gaining income in the form of rent for housing, storage and other space, cars, instruments of labour, and land.

Code 14 "Dependent" is to be encircled for persons, living at the expense of relatives or other people, as well as for persons receiving alimony.

Code 15 "Other source" is to be encircled for persons having other sources of livelihood than those listed above. For example, personal or family savings, income of clergymen, casual earnings, charity, humanitarian aid, support of religious organizations, etc.

Question 14. Sources of livelihood

Before asking this question a person interviewed is to be given a card with all sources of livelihood listed. After the list has been studied, the person is to name one or several sources of livelihood out of those listed. Based on the answer the enumerator is to circle codes corresponding to one or several responses given.

After this the enumerator is to question the person about the main source of livelihood, which is to be named by the person him/herself.

If a person questioned names only one source of livelihood, the code corresponding to this source is to be entered in a special box as main.

If a person questioned names several sources of livelihood, it should be cleared up which of the sources named he/she considers the main one and the code of this source is to be entered in a special box.

Any of sources listed on the card can be named as main if:

- compensation or income is higher than in other sources of livelihood;
- income is permanent;
- on an equal level, the source with most days worked is to be preferred.

The category of those having work, both as employees and self-employed, covers persons who at the moment of census:

- performed work, whether it was a permanent, temporary, seasonal or other paid work, as well as worked for profit as self-employed, alone or with one or a few partners, both engaging or not engaging employees, irrespective of the dates of receiving a direct payment or profit for their work;
- worked without payment in their family business or on their family farm;
- were temporarily absent from work, but kept formal attachment to their work.

The following is to be considered as temporary absence from work:

- illness or injury, care for sick persons;
- annual leave or weekend, compensatory leave or time-off, compensation of overtime or work on a public holiday;
- statutory maternity and child-care leave;
- educational leave;
- unpaid or paid leave on the initiative of administration;
- rotational, seasonal or other specialized mode of operation;
- strike action;
- other reasons.

Besides, the category of persons with employment includes people engaged in spring, summer or autumn to perform seasonal work (e.g., in agriculture, water transport, fishery, etc.).

- income is permanent;
- on an equal level, the source with most days worked is to be preferred.

The category of those having work, both as employees and self-employed, covers persons who at the moment of census:

- performed work, whether it was a permanent, temporary, seasonal or other paid work, as well as worked for profit as self-employed, alone or with one or a few partners, both engaging or not engaging employees, irrespective of the dates of receiving a direct payment or profit for their work;
- worked without payment in their family business or on their family farm;
- were temporarily absent from work, but kept formal attachment to their work.

The following is to be considered as temporary absence from work:

- illness or injury, care for sick persons;
- annual leave or weekend, compensatory leave or time-off, compensation of overtime or work on a public holiday;
- statutory maternity and child-care leave;
- educational leave;
- unpaid or paid leave on the initiative of administration;
- rotational, seasonal or other specialized mode of operation;
- strike action;
- other reasons.

Besides, the category of persons with employment includes people engaged in spring, summer or autumn to perform seasonal work (e.g., in agriculture, water transport, fishery, etc.).

Students and pensioners having employment or gainful business are to be referred to those employed or self-employed on the same ground as other categories of persons.

The activity of persons engaged in non-reimbursable public or voluntary works is not to be marked as a source of livelihood.

Employees (those working under a written labour contract or verbal agreement) cover persons that concluded with the administration of an enterprise, organization, institution of any ownership or with a private employer a written labour contract or verbal agreement about working conditions and receive emolument (in cash or in kind). The following codes are used for this category:

Code 1 "At enterprise, organization, institution" is to be marked for those employed at enterprises, organizations, institutions of any ownership (e.g. at a state-owned or communal enterprise, joint-stock company, private or joint venture, public or religious organization, fund, production cooperative, etc.); as well as for paid apprentices.

Code 1 "At enterprise, organization, institution" is also to be marked as a source of livelihood for all military servicemen (other than army conscripts), wage and salary workers of military units living outside closed territories.

Code 2 "On a farm" is to be marked for persons employed in farming (peasant) enterprises and receiving remuneration for their labour (both in cash and in kind).

Code 3 "For individuals (including those rendering household services)" is to be marked for persons employed on an individual basis by individuals (e.g. salesmen, vendors) or those rendering household services for payment in cash or in kind (e.g., cooks, tutors, drivers, baby-sitters, etc.)

Self-employed include persons who work at their own working place or enterprise for making profit or family income in cash or in kind, and also for persons who own their business but do not temporarily work for any reason. The following codes are used in this category:

Code 4 "Owner of enterprise, farm (employer)" is to be marked for persons working on their own account or with partners and engaging one or more employees.

Code 5 "On an individual basis" is to be marked for self-employed persons engaged in individual professional or commercial activity.

Code 6 "Unpaid family worker at family enterprise or farm" is to be marked for persons working without compensation on a family farm or at an enterprise owned by relatives.

Code 7 "At personal subsidiary plot" is to be marked for people carrying out in their personal subsidiary plots (including gardens, kitchen gardens, country house plots, etc.) agricultural works and livestock management. This source of livelihood is to be marked not only for persons engaged in production of agricultural products for sale, but also for those producing agricultural products for own consumption if this kind of activity provides a considerable contribution to the total household consumption.

Code 8 "Scholarship" is to be marked for students receiving scholarships (including scholarships paid to students detached by enterprises, organizations, or employment services).

Code 9 "Pension" is to be marked for persons receiving old age or retirement, disability, survivor's, and long service pensions. It should be borne in mind that "pension" is to be marked for persons whom it is granted, but not for those who actually receive it. So the survivor's pension granted to children is to be marked for children, but not for their mother or father, even if they are actual recipients.

Code 10 "Benefit (other than unemployment benefit)" is to be marked for persons receiving:

- common monthly low-income family/citizens benefit, which is assigned to: children under 16 years of age and pupils of general education schools up to completion of training, but not after the attainment of the age of 18 years; pupils of basic vocational schools, students of secondary and higher education establishments up to the attainment of the age of 21 years; nonworking pensioners; disabled persons;
- one-time maternity grant;
- benefit to mothers giving birth to twins (triplets or more children);
- benefit to nonworking mothers with children under 1.5 years of age;
- monthly social benefit assigned to:

handicapped children, children having infantile cerebral paralysis, children HIV-positive or sick with AIDS; those disabled, the aged, mother-heroes, children in the case of loss of breadwinner if these categories of citizens are not entitled to pension. It should be noted that "benefit" is to be marked for persons whom it is granted, but not for those who actually receive it.

Code 11 "Unemployment benefit" is to be marked for persons registered with the employment services as unemployed and who are recipients of unemployment benefits.

Code 12 "Other government support" is to be encircled for inmates of infant's homes, children's homes, boarding schools, boarding houses for the aged and invalids and similar persons supported by governmental and non-governmental organizations.

Code 13 "Property income" is to be encircled for persons gaining income in the form of interest on their money deposits, credits, loans, equities, shares, as dividends or difference in rates, and for persons gaining income in the form of rent for housing, storage and other space, cars, instruments of labour, and land.

Code 14 "Dependent" is to be encircled for persons, living at the expense of relatives or other people, as well as for persons receiving alimony.

Code 15 "Other source" is to be encircled for persons having other sources of livelihood than those listed above. For example, personal or family savings, income of clergymen, casual earnings, charity, humanitarian aid, support of religious organizations, etc.

Question 15. Employment

This question is to be completed for both employed and self-employed.

In subquestion a) "the name and type of activity of the enterprise where you work or the type of work you do" a full name of the enterprise, institution or organization of the person's questioned primary employment is to be completed in order it could be possible to determine the activity of the employment. For instance, it should be recorded not "LLC Bereke", but "LLC cafe Bereke", not "JSC factory named after All-Union Leninist Young Communist League", but "JSC clothing manufactory named after All-Union Leninist Young Communist League". In selected cases only the branch or the kind of production can be specified, e.g.: "Glass manufacturing plant", "Brick works" or "Chemical factory", "Coca-cola production joint venture".

For persons employed at diversified enterprises, e.g., at a company or concern, not the name of the company or concern itself should be recorded, but the names of specific enterprises that company or concern comprises (e.g., not the name of the company "Eridan" is to be recorded, but a detailed name of an extractive, trade or manufacturing enterprise, etc.).

If a person interviewed works as a full-time official of trade union or other public associations, the name of the enterprise and the activity "trade union" are to be recorded.

For persons working in workshops, ateliers, and service centres a full name of a given enterprise should be recorded: "Sewing workshop", "Shoe-repair store".

Dear enumerator! You have made a mistake if in question 15 after the name of the enterprise where the person questioned works you failed to specify the exact activity of this enterprise or the type of work done. Please, go back to this question and, if necessary, revise the record.

When completing question 15, the enumerator is to obey the following:

- if in question 14, codes 1, 2 or 3 are circled for sources of livelihood, the name and by all means the activity of the enterprise should be recorded;
- if in question 14, codes 4, 5 or 6 are circled for sources of livelihood, the name of the enterprise and by all means the specific type of work done are to be recorded;
- if in question 14, code 7 is circled for a source of livelihood, "personal subsidiary plot" is to be entered.

Names of enterprises and institutions should not be recorded as abbreviations (e.g., it is impermissible to specify JPF instead of "Joint peasant farm"). Only well-known abbreviations can be admitted (e.g., ??? (TPP), ??? (Civil Registry Office)).

For persons working in canteens, first-aid posts, barbershops, etc. attached to enterprises or firms, the name of the canteen, first-aid post, barbershop, etc., but not the name of the enterprise or firm, workers of which they serve, is to be recorded (e.g., "Canteen of the worsted-woolen integrated works").

For persons employed by individuals the corresponding type of activity is to be recorded, e.g. for a salesman engaged in retail trade "retail trade" is to be recorded, and for a self-employed person (e.g., a secretary, tutor, baby-sitter, cook, driver) "rendering household services" is to be entered.

For persons engaged in "shuttle business", "wholesale trade" is to be specified if they are only engaged in purchase and delivery of goods. If those persons along with purchase and delivery of goods are also engaged in sale thereof, "retail trade" is to be recorded for them.

For persons engaged in own farming, "agriculture" is to be recorded with indication of a specific area (crop production, animal husbandry, etc.) or the kind of work done.

For self-employed persons the type of their activity is to be recorded, e.g., "overclothes tailoring", but not "business". A specific activity should be indicated, e.g. "real estate business", "wholesale trade", etc.

For unpaid family workers or unpaid workers of farming holding a detailed name of the enterprise and its activity should be recorded or "agriculture" with indication of a specific area (crop production, animal husbandry, etc.) or the kind of work done.

Military servicemen, wage and salary workers of military units and institutions living outside closed territories are to answer in accordance with the instructions of their authorities. If military servicemen, wage and salary workers of military units for any reason (absent from briefing or because of forgetfulness) are not able to answer, "institution" is to be recorded as their place of employment.

For ministers of religion and persons engaged in the field of religious faiths, the name of the religious service place is to be recorded (mosque, church, synagogue, etc.)

For persons having permanent employment and at the same time receiving a pension, benefit, scholarship or engaged in work in own personal subsidiary plot, the name of the enterprise where they work and its activity is to be recorded.

For persons having double (or more) employment the employment which the person questioned regards as main is to be recorded.

For all persons having no employment, children inclusive, "No" is to be filled in.

In subquestion b) "place of work" the answer is to be completed for all persons with the first part of question 15 completed.

For those living and working in Kyrgyzstan the name of the city or district where the place of employment is located is to be entered. For instance, if a person questioned lives in the village of Lebedinovka and works in the city of Bishkek, "city of Bishkek" is to be recorded.

For persons working in the territory of other countries (states) the name of this territory is to be entered. For instance, if a person questioned lives in the city of Kara-Su and works in the city of Andizhan, "Uzbekistan" is to be filled in for him/her.

Question 16. Main activity (a detailed name of position, occupation or work done)

For all persons having employment the name of the position, occupation or duties is to be recorded.

For persons combining multiple jobs only the activity is to be recorded which the person questioned considers his/her main activity.

If a person questioned is temporarily involved in the activity outside his main occupation, the main activity is to be recorded.

The position, occupation or duties are to be recorded in detail. One must not just record "director", "chief of department", "main specialist", "specialist", "trainee", "adviser", "expert", "master", "operator", "laboratory technician", but should indicate, for instance, "deputy director for economy", "chief of the marketing department", "main specialist in broadcasting", "personnel specialist", "information protection expert", "hospital trainee", "adviser on economic questions", "legislative counsel", "expert physicist", "shotfirer", "computer operator", "machine milking operator", "analyst in chemistry laboratory", etc.

"Unskilled laborer or helper" is to be only recorded for those engaged in different odd-jobs (excluding agricultural works), but in other cases the nature of work performed should be determined and recorded, for instance, "loader".

"Agriculture" should be only recorded for persons without any definite specific duties who are engaged in various unskilled works at agricultural enterprises (farms). For persons with definite duties in agriculture their occupation is to be recorded (e.g.: "horse wrangler", "shepherd", "horse-breeder", "cattlemen").

For self-employed persons the name of their occupation is to be indicated (for instance, "photographer", "dentist", "composer", "lacemaker", "sewer", "market seller", "vendor", etc.).

For persons employed to provide services to private households their positions should be recorded: "personal secretary", "cook", "baby-sitter", "tutor", etc.

For members of a farming (peasant) enterprise the name of occupation should be recorded according to the area of specialization of the enterprise, for instance, "stock-farmer", etc.

For persons only working without pay for their family business or farm their prevailing duties should be recorded. For example, if a family worker is the most of time engaged in unloading of goods, for him/her "loader" should be recorded; if he/she is constantly engaged in bread making, "panification" should be specified, etc.

For persons only engaged in developing own personal subsidiary plots (agricultural works or cattle management), "personal subsidiary plot" is to be indicated.

For military servicemen (other than army conscripts), wage and salary workers of military units and institutions living outside closed territories, whose positions cannot be assimilated to similar civil positions, "salary worker" is to be entered.

For persons having permanent employment and at the same time receiving a pension, benefit, scholarship or engaged in work at own personal subsidiary plot, the occupation or functions in this employment are to be recorded.

Question 18. For women aged 15 years and over specify

The question is asked of women at the age of 15 years and over, both married and not married.

For persons under 15 years this question is usually not to be filled in. But if a woman interviewed gave birth to children, relevant answers should be recorded for her either.

The answers are to be recorded in numbers in a specially dedicated boxes.

- a) how many children were born?

In the answer to this question the total number of children ever born (excluding stillbirths) is to be marked, whether all children are alive at the moment or not or whether they are members of the woman's household or live separately. Herewith, adopted or patronized children, as well as children of her husband's previous marriage, are not to be included in the number of children born to the woman.

If a woman did not give birth to any child, "0" is entered in items "a", "b", and "c".

- b) how many of them do survive?

In the answer to this question the number of children born to the woman and surviving at the census moment is to be recorded.

If of the number of children born to the woman at the census moment no children survive, "0" is entered in items "b" and "c".

- c) how many of them do live separately?

In the answer to this question the number of children living at the census moment separately from their mother, i.e. who are not members of her household (e.g., because of their departure for training or separating into an independent household, etc.) is to be stated.

If all children ever born live together with their mother, in item "c" the numeral "0" is to be placed.

- d) no answer

If a woman questioned for some reasons did not answer the questions asked, Code 99 is to be circled in the enumeration form.

Interviewer instructions	

Question 14. Sources of livelihood

Before asking this question a person interviewed is to be given a card with all sources of livelihood listed. After the list has been studied, the person is to name one or several sources of livelihood out of those listed. Based on the answer the enumerator is to circle codes corresponding to one or several responses given.

After this the enumerator is to question the person about the main source of livelihood, which is to be named by the person him/herself.

If a person questioned names only one source of livelihood, the code corresponding to this source is to be entered in a special box as main.

If a person questioned names several sources of livelihood, it should be cleared up which of the sources named he/she considers the main one and the code of this source is to be entered in a special box.

Any of sources listed on the card can be named as main if:

- compensation or income is higher than in other sources of livelihood;
- income is permanent;
- on an equal level, the source with most days worked is to be preferred.

The category of those having work, both as employees and self-employed, covers persons who at the moment of census:

- performed work, whether it was a permanent, temporary, seasonal or other paid work, as well as worked for profit as self-employed, alone or with one or a few partners, both engaging or not engaging employees, irrespective of the dates of receiving a direct payment or profit for their work;
- worked without payment in their family business or on their family farm;
- were temporarily absent from work, but kept formal attachment to their work.

The following is to be considered as temporary absence from work:

- illness or injury, care for sick persons;
- annual leave or weekend, compensatory leave or time-off, compensation of overtime or work on a public holiday;
- statutory maternity and child-care leave;
- educational leave;
- unpaid or paid leave on the initiative of administration;
- rotational, seasonal or other specialized mode of operation;
- strike action;
- other reasons.

Besides, the category of persons with employment includes people engaged in spring, summer or autumn to perform seasonal work (e.g., in agriculture, water transport, fishery, etc.).

Students and pensioners having employment or gainful business are to be referred to those employed or self-employed on the same ground as other categories of persons.

The activity of persons engaged in non-reimbursable public or voluntary works is not to be marked as a source of livelihood.

Employees (those working under a written labour contract or verbal agreement) cover persons that concluded with the administration of an enterprise, organization, institution of any ownership or with a private employer a written labour contract or verbal agreement about working conditions and receive emolument (in cash or in kind). The following codes are used for this category:

Code 1 "At enterprise, organization, institution" is to be marked for those employed at enterprises, organizations, institutions of any ownership (e.g. at a state-owned or communal enterprise, joint-stock company, private or joint venture, public or religious organization, fund, production cooperative, etc.); as well as for paid apprentices.

Code 1 "At enterprise, organization, institution" is also to be marked as a source of livelihood for all military servicemen (other than army conscripts), wage and salary workers of military units living outside closed territories.

Code 2 "On a farm" is to be marked for persons employed in farming (peasant) enterprises and receiving remuneration for their labour (both in cash and in kind).

Code 3 "For individuals (including those rendering household services)" is to be marked for persons employed on an individual basis by individuals (e.g. salesmen, vendors) or those rendering household services for payment in cash or in kind (e.g., cooks, tutors, drivers, baby-sitters, etc.)

Self-employed include persons who work at their own working place or enterprise for making profit or family income in cash or in kind, and also for persons who own their business but do not temporarily work for any reason. The following codes are used in this category:

Code 4 "Owner of enterprise, farm (employer)" is to be marked for persons working on their own account or with partners and engaging one or more employees.

Code 5 "On an individual basis" is to be marked for self-employed persons engaged in individual professional or commercial activity.

Code 6 "Unpaid family worker at family enterprise or farm" is to be marked for persons working without compensation on a family farm or at an enterprise owned by relatives.

Code 7 "At personal subsidiary plot" is to be marked for people carrying out in their personal subsidiary plots (including gardens, kitchen gardens, country house plots, etc.) agricultural works and livestock management. This source of livelihood is to be marked not only for persons engaged in production of agricultural products for sale, but also for those producing agricultural products for own consumption if this kind of activity provides a considerable contribution to the total household consumption.

Code 8 "Scholarship" is to be marked for students receiving scholarships (including scholarships paid to students detached by enterprises, organizations, or employment services).

Code 9 "Pension" is to be marked for persons receiving old age or retirement, disability, survivor's, and long service pensions. It should be borne in mind that "pension" is to be marked for persons whom it is granted, but not for those who actually receive it. So the survivor's pension granted to children is to be marked for children, but not for their mother or father, even if they are actual recipients.

Code 10 "Benefit (other than unemployment benefit)" is to be marked for persons receiving:

- common monthly low-income family/citizens benefit, which is assigned to: children under 16 years of age and pupils of general education schools up to completion of training, but not after the attainment of the age of 18 years; pupils of basic vocational schools, students of secondary and higher education establishments up to the attainment of the age of 21 years; nonworking pensioners; disabled persons;
- one-time maternity grant;
- benefit to mothers giving birth to twins (triplets or more children);
- benefit to nonworking mothers with children under 1.5 years of age;
- monthly social benefit assigned to:

handicapped children, children having infantile cerebral paralysis, children HIV-positive or sick with AIDS; those disabled, the aged, mother-heroes, children in the case of loss of breadwinner if these categories of citizens are not entitled to pension. It should be noted that "benefit" is to be marked for persons whom it is granted, but not for those who actually receive it.

Code 11 "Unemployment benefit" is to be marked for persons registered with the employment services as unemployed and who are recipients of unemployment benefits.

Code 12 "Other government support" is to be encircled for inmates of infant's homes, children's homes, boarding schools, boarding houses for the aged and invalids and similar persons supported by governmental and non-governmental organizations.

Code 13 "Property income" is to be encircled for persons gaining income in the form of interest on their money deposits, credits, loans, equities, shares, as dividends or difference in rates, and for persons gaining income in the form of rent for housing, storage and other space, cars, instruments of labour, and land.

Code 14 "Dependent" is to be encircled for persons, living at the expense of relatives or other people, as well as for persons receiving alimony.

Code 15 "Other source" is to be encircled for persons having other sources of livelihood than those listed above. For example, personal or family savings, income of clergymen, casual earnings, charity, humanitarian aid, support of religious organizations, etc.

Person weight (PERWT)

File: KGZ1999-P-H

Overview

Type: Continuous
Format: numeric
Width: 8
Decimals: 2

Valid cases: 0
Invalid: 0

Description

PERWT indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.

NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

Educational attainment, international recode [general version] (EDATTAIN)

File: KGZ1999-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.
