## Overview

### Identification

#### ID NUMBER

UNHCR\_CHN\_2021\_VACC\_Q2\_v2.1

### Version

#### VERSION DESCRIPTION

v2.1: Edited, anonymous dataset for licensed distribution.

### Overview

#### ABSTRACT

The COVID-19 Vaccination Survey in China was conducted in July 2021 to understand refugees' accessibility and willingness to receive a COVID-19 vaccination in China. UNHCR stresses that no one can be left behind in the global effort against COVID-19 and is monitoring the inclusion of refugees and asylum seekers in vaccination plans around the world. At the time, Chinese government policy did not provide free vaccines for foreigners without social security. The survey results however show that this policy was implemented with some flexibility, because among the few that were vaccinated already, more than half received a free COVID-19 vaccine. Some refugees reported difficulties or lack of information about vaccine registration or identity documents to book an appointment. Results further show that even though most are willing to get vaccinated, anti-vaccine sentiments are driven by fear of side effects.

#### KIND OF DATA

Census/enumeration data [cen]

#### UNITS OF ANALYSIS

Households

### Scope

#### NOTES

The household survey covers the following sections:

1. Household demographics
2. Source of information about COVID-19
3. Willingness to get vaccinated
4. Status of vaccination (possible costs for vaccine; appointment booking; reasons for not having received 1st/2nd shot)

POC = Persons of Concern to UNHCR

### DDI DOCUMENT VERSION

v1.0

## Sampling

### **Sampling Procedure**

---

No sampling was implemented.

### **Response Rate**

---

Out of 1017 distributed surveys, UNHCR received 455 answers (45%). Of those, 30 respondents did not provide consent to participate in the survey.

### **Weighting**

---

Sample weights were calculated for each household as the total number of beneficiaries divided by the total response rate.

# Questionnaires

## Data Collection

### Data Collection Dates

---

<b>Start</b>	<b>End</b>	<b>Cycle</b>
2021-06-28	2021-07-05	N/A

### Data Collection Mode

---

Self-administered questionnaire: Web-based

### Data Collection Notes

---

The survey was distributed in UNHCR's online survey platform Kobo using email addresses from UNHCR's registration database. The survey was translated in six different languages and respondents were able to select the preferred language before starting the questionnaire. The introduction email included clear instructions on how to fill out the survey as well as asked for respondents' consent.
