Overview

ABSTRACT

Registration in Uganda is carried out by the Government of Uganda through the Office of the Prime Minister (OPM) with support from the United Nations High Commissioner for Refugees (UNHCR). In October 2021, OPM and UNHCR commenced a joint verification and individual profiling exercise (IPE) targeting 1,549,181 refugees and asylum seekers consisting of 388,989 households residing in all settlements and urban areas in Uganda. The main population groups are the South Sudanese (61%), Congolese (29%), Burundi (3%), Somali (3%) and the remaining 3% being refugees and asylum seekers from 27 different countries. The exercise is expected to be completed by end of October 2022.

The exercise aims to verify the refugee population in Uganda, issue new generation refugee documents (QR compatible) and assess the social economic profiles of refugee households through Individual profiling. Verification will be combined with individual profiling using a desk bound assessment questionnaire, with validation of profiling data through sampling by making home visits. 10% of the verified households will be sampled based on strata covering settlement, country of origin, ethnicity, household with persons with special needs, family composition and year of arrival.

By mid July 2022, verification/individual profiling was complete in 6 priority settlements (Imvepi, Kyaka II, Kyangwali, Nakivale, Oruchinga and Rwamwanja) with 9,480 home visits undertaken.

Sampling

Sampling Procedure

Sampling used ProGres as a sampling frame. Refugees were stratified according settlement, village/zone, country of origin and time of arrival (more or less than 5 years). From that list, defined for the verification exercise, a subsample of 10% randomly selected households from the verified households were selected for a follow up home visit
