ABSTRACT

Cash-Based Interventions (CBI) are used by the UNHCR as one of the preferred mean of delivering assistance to forcibly displaced and stateless persons in line with its core protection mandate. Following CBI interventions, post-distribution monitoring (PDM) surveys are organized among recipients to gather their feedbacks to measure the effectiveness of assistance and take measure to improve subsequent similar interventions. The underlying principle behind the process is linked to accountability, as well as a commitment to improve the quality and relevance of support provided, and related services. This CBI PDM was conducted on Refugees households living in settlements in 6 administrative areas of Mali (Gossi, Menaka, Ntillit, Gao, Tessit, Tombouctou) between the 23-26th Aug 2021. A sample of 426 Households distributed across the 6 locations was randomly selected and interviewed in this exercise.
