Jordan	JOR

### ABSTRACT

The main objective of the Mobile Needs Assessment is to update the knowledge base on the humanitarian needs and livelihoods situation at the household level for non-Syrian refugees in Jordan, inform the development of a vulnerability-based targeting strategy and strengthen the current food assistance framework, with the goal of providing longer-term assistance based on needs and improve food security in a sustainable manner.

Specific objectives of the Mobile Needs Assessment include:

Collecting first-hand up-to-date data on an extended sample of non-Syrian refugees

Exploring and understanding refugees' basic needs, vulnerability, and livelihood opportunities also in the context of the COVID-19 onset;

Describing the socio-economic profile of and identify the most vulnerable non-Syrian refugee households;

Informing the programmatic decisions and targeting approach development for WFP in Q2-Q3 2021 and contributing to the existing evidence on targeting for UNHCR.

## Sampling

### SAMPLING PROCEDURE

In total, there are 89,818 non-Syrian individuals living in 44,570 households in Jordan. To generate representative findings for three different strata (Geography – Amman vs. Other areas; nationality –Iraqis vs. Non-Iraqis; assistance status – Beneficiaries vs. Non-beneficiaries of any UNHCR/WFP assistance), a total of complete 1548 household surveys are needed to achieve 95% confidence level and around 4% margin error for each strata.
