ABSTRACT
To ensure the centrality of refugees' voices in discussions about their future, as well as to inform evidence-based inter-agency responses in support of host Governments, UNHCR is leading the regular implementation of intentions surveys with refugees from Ukraine, collecting primary data on their profiles, their current situation and intentions, and the factors influencing their decision-making.

The first and second regional intentions surveys were completed and the report published in July 2022 (https://data.unhcr.org/en/documents/details/94176) and September 2022 (https://data.unhcr.org/en/documents/details/95767). This data was collected during the third round, conducted between December 2022 and January 2023. The survey covered refugees hosted in countries in Europe. In addition, the third round included a longitudinal sample of refugees surveyed in both the second and third rounds. The report was published in Februrary 2023 (https://data.unhcr.org/en/documents/details/99072).

A mixed methodological approach was used, combining two data collection modes. Around 3,900 refugee households (2,100 from countries neighboring Ukraine and 1,800 from other host countries) were interviewed either through a phone-based survey, web-based survey or face-to-face interview. A total of 887 households participated in both the second and third round (longitudinal sample). All surveys used a harmonized questionnaire.

This data is an anonymous version of the original data collected and used for the primary analysis.
