### ABSTRACT

To ensure the centrality of refugees' voices in discussions about their future, as well as to inform evidence-based inter-agency responses in support of host Governments, UNHCR is leading the regular implementation of intentions surveys with refugees from Ukraine, collecting primary data on their profiles, their current situation and intentions, and the factors influencing their decision-making.

The first, second and third regional intentions surveys were completed and the reports published in July 2022 (<https://data.unhcr.org/en/documents/details/94176>), September 2022 (<https://data.unhcr.org/en/documents/details/95767>) and February 2023 (<https://data.unhcr.org/en/documents/details/99072>). This data was collected during the fourth round, conducted between April and May 2023. The survey covered refugees hosted in countries in Europe.

A mixed methodological approach was used, combining two data collection modes. Around 3,850 refugee households were interviewed either through a phone-based survey, web-based survey or face-to-face interview. The data include a mix of 'Fresh' refugee households (i.e. not included in previous rounds) and 'Panel' households (i.e. those included in at least one of the previous rounds). All surveys used a harmonized questionnaire.

This data is an anonymous version of the original data collected and used for the primary analysis.
